The Search for Why Bob Raleigh,2021-01-19 EVER WONDERED WHY PEOPLE REALLY DO WHAT THEY DO AND WHAT WE COULD ACCOMPLISH IF WE ONLY KNEW We need a clear eyed look at what s happening in society right now Misinformation fake news and politicization is affecting how we as a society come to grips with a global pandemic economic inequality and racial injustice If we are to mend the divides between us and grapple with the challenges before us

we need first to understand the why In *The Search for Why* Bob Raleigh provides a new model for how to understand human behavior the fundamentals of why we do what we do He draws on his experience in market research and public communication strategy and combines that with research in the social sciences like psychology cognitive and behavioral sciences and anthropology *The Search for Why* covers topics like Why so frequently people seem to act against their own best interests both in politics and their personal lives How to better communicate with one another across political and cultural divides How to craft persuasive messages that meet people where they are and listen to what they are saying back Ways you can apply this model to help build a better world at a personal social and global level What influences our decisions even when we don't realize it For anyone looking to persuade people heal divisions or build better relationships *The Search for Why* is a crucial step in the right direction

Spiritual Humanism Louis Carini, 2001-01-12 Astronomers discarded first hand visual observations because each observer measured a star's transit as occurring at a different time Physicists soon followed them so that now instrumental measurements are the only data that physics and astronomy accept The theory of evolution followed them in that physicalist mode by accounting only for the physical survival of organisms That is why their sciences deny the existence of anything of a spiritual nature This little book examines their theorized big bang beginning and the physicalist theory of evolution in the light of the newly measured human consciousness through whose thinking processes both of those sciences arose Spiritual humanism aims to provide a nondogmatic faith in humanity and in principles which place human beings their values their thinking and their enspirited consciousnesses as central to creating all of our sciences The spiritual aspect arises especially from our consciousness which allows us to reflect upon what is in our awareness The qualities of our awarenesses and consciousness are explained by the anthropomorphic theory of human perception which attributes human qualities even to our senses The book suggests that consciousness places us in a realm of being beyond the physical Though our physical brains are proposed as the basis for that consciousness the outcome in consciousness creates a spiritual quality in human beings Spiritual humanism accordingly is concerned with human beings and is centered entirely in this human world rather than in any other Thus a non dogmatic spiritual humanism for fostering the potentialities in human beings in this world is what this little book means to provide The experiences of the young Helen Keller show how consciousness becomes the basis for disinterested interests the ability to be deeply engrossed in something unrelated to our own self interest That disinterested interest is what lies behind our engagements with the arts the sciences and our religious aspirations The assumption of an entirely physical origin for the physicists theoretical big bang along with Darwin's physicalist theory of evolution are criticized because both methodologies preclude finding anything of the spirit A reinterpretation of what follows from these critiques and the positive formulation of the humanist science of anthropomorphic optics and its implications are what the book provides

The Psychopathology of Political Ideologies

Robert Samuels,2021-09-28 Inspired by Freud's *The Psychopathology of Everyday Life* this book examines the unconscious processes shaping contemporary political ideologies Addressing ten fundamental questions Robert Samuels identifies four basic political ideologies liberal conservative Left and Right which are often placed in the structure of a logical square determined by two binary oppositions with a fifth structure of centrism complicating the square He turns to psychoanalysis to explain the unconscious defense mechanisms that structure these political ideologies Each chapter uses a recent influential title as a gateway to the analysis of the ideologies and structures identified Through this analysis Samuels argues that belief in ideological structures is tied to triumvirates of institutions and ideals conservatives being tied to premodern institutions of religion feudalism and monarchy while modern liberals are tied to ideals of universality objectivity and empiricism He concludes that this investment in universality shapes the ethics of modern globalization and democratic liberalism Unlike other books conclusions are reinforced through examples drawn from current events with an integrated model of different psychopathologies *The Psychopathology of Political Ideologies* moves beyond providing an understanding of what drives different political investments to offer a more rational and conscious comprehension of subjectivity and social organization This book will be a great resource for those interested in politics political science psychology social psychology globalization and ideology

Social Perception and Social Reality Lee Jussim,2012-04-06 *Social Perception and Social Reality* contests the received wisdom in the field of social psychology that suggests that social perception and judgment are generally flawed biased and powerfully self fulfilling Jussim reviews a wealth of real world survey and experimental data collected over the last century to show that in fact social psychological research consistently demonstrates that biases and self fulfilling prophecies are generally weak fragile and fleeting Furthermore research in the social sciences has shown stereotypes to be accurate Jussim overturns the received wisdom concerning social perception in several ways He critically reviews studies that are highly cited darlings of the bias conclusion and shows how these studies demonstrate far more accuracy than bias or are not replicable in subsequent research Studies of equal or higher quality which have been replicated consistently are shown to demonstrate high accuracy low bias or both The book is peppered with discussions suggesting that theoretical and political blinders have led to an odd state of affairs in which the flawed or misinterpreted bias studies receive a great deal of attention while stronger and more replicable accuracy studies receive relatively little attention In addition the author presents both personal and real world examples such as stock market prices sporting events and political elections that routinely undermine heavy handed emphases on error and bias but are generally indicative of high levels of rationality and accuracy He fully embraces scientific data even when that data yields unpopular conclusions or contests prevailing conventions or the received wisdom in psychology in other social sciences and in broader society
