The Vetiver System For Soil And Water Conservation:

The Vetiver System For Soil And Water Conservation John C. Greenfield, 2008-06-05 This handbook is based on John Greenfield's earlier book *Vetiver Grass The Hedge Against Erosion*. It updates the text and matches actual photographic examples of Vetiver System applications against the original line drawings. The handbook remains primarily a handbook for lay users interested in basic soil and water conservation practices using the Vetiver System. It is simply written and contains enough information and facts so that even the least technically educated users can confidently read, apply, and achieve good results. We have gone a long way with the Vetiver System since John Greenfield wrote the first handbook in 1987. However, the same basic principles apply and the technology remains low cost, effective, and easy to use. The technology is used in every tropical and subtropical country in the world as well as some countries outside the tropics.

Biological Soil & Water Conservation. H. Jonas Åkerman, 2025-04-02 This book *Biological Soil Water Conservation* uses the Vetiver grass as an example. It is one example. The book is a simple orientation about using vetiver grass as a straightforward method of applying biological soil and water conservation methods in smallholder farmers' environments. The focus is mainly on African environments from which he collects most of his examples, but there are also examples from Iraqi Kurdistan, Iran, India, Sri Lanka, and Sweden. The material and the level are meant to be suitable as an orientation and introduction for non-specialist students in, for example, Physical and Human Geography, Geology, and Sustainability Studies, and as a general background for various project administrators who need an elementary introduction to biological soil and water conservation methods.

Vetiver Grass System Paul Nouyen Truong, 1993 *Vetiver Grass System* P. N. Truong, 1996 *Vetiver Grass for Soil and Water Conservation, Land Rehabilitation, and Embankment Stabilization* Vetiver Network, 1995. Vetiver grass is the ideal plant for vegetative soil and moisture conservation. Vetiver grass is the hedge against erosion. The role of vetiver grass in sustaining agricultural productivity.

The Vetiver System for Improving Water Quality Paul Truong, Tran Tan Van, Elise Pinnars, 2008. The Vetiver System relies on a unique tropical plant, vetiver grass, that has been proven and used in some 100 countries for soil and water conservation, slope stabilization, land rehabilitation, pollution control, water quality improvement, disaster mitigation, and many other environmental applications that can mitigate the impact of global warming and climate change. The world and its people, particularly in the poorer countries located in tropical and semi-tropical countries, face major environmental and health problems due to the contamination of water and land. The Vetiver System provides one solution to deal with these problems. This well-color illustrated handbook focuses on improving water quality and has been written for planners, technicians, and communities to show how the technology has been used in the recent past and how it can be used in the future.

The Vetiver System for Agriculture Paul Truong, Tran Tan Van, Elise Pinnars, 2008. The Vetiver System (VS) relies on a unique tropical plant, vetiver grass, which has been proven and used in some 100 countries for soil and water conservation, slope stabilization, land rehabilitation, pollution control, water quality improvement, disaster mitigation, and many

other environmental applications that can mitigate the impact of global warming and climate change The Vetiver System is easy to use low cost and if applied correctly works This handbook describes its most important uses for the agricultural sector where it should be a key farm technology for farmers of any scale but particularly small farmers and rural communities in tropical and sub tropical countries where it could change the lives of many thousands of people through the provision of a better quality of life and income benefits At this time of approaching global food shortages and high food prices the the Vetiver System should be considered and used by every farmer in the tropics *Handbook of Water Harvesting and Conservation* Saeid Eslamian, Faezeh Eslamian, 2021-03-01 Water harvesting is gaining more and more recognition as a sustainable and resilient water supply options It is economically viable socially compatible and environmentally friendly Water harvesting has proven to be a robust solution to overcome or reduce water shortages all over the world It is important to understand how to apply this practice in a sustainable and effective way to make full use of its potential in a world increasingly threatened by water scarcity The Handbook of Water Harvesting and Conservation Basic Concepts and Fundamentals is the most comprehensive up to date and applied handbook on water harvesting and conservation yet published The book s 30 chapters written by 84 outstanding international experts from approximately 20 selected countries faced by drought explore critique and develop concepts and systems for water harvesting The editors bring together many perspectives into a synthesis that is both academically based and practical in its potential applications The Handbook of Water Harvesting and Conservation Basic Concepts and Fundamentals is an important tool for education research and technical works in the areas of soil water and watershed management and is highly useful for drought strategy planning flood management and developing techniques to adapt to climate change in urban agricultural forest and rangeland areas

Halophytes as a resource for livestock and for rehabilitation of degraded lands V. Squires, A.T. Ayoub, 2012-12-06

Desertification land degradation in arid semi arid and dry sub humid areas resulting mainly from adverse human impacts is the main environmental problem of dry lands which occupy more than 40 per cent of the total global land area The phenomenon threatens about 3 6 billion hectares and currently affects the livelihood of about 900 million people Thl world is now losing annually about 1 5 million hectares of total irrigated lands 240 million hectares due mostly to salinization mainly in drylands Salt affected soils are widely distributed throughout the arid and semi arid regions and particularly severe in China 7 million ha India 20 million ha Pakistan 3 2 million ha USA 5 2 million ha as well as Near East southern Europe and elsewhere Demands on production have increased the pressure on existing productive land and moved the limits of production onto increasingly marginal lands Wise land use practices have yet to be developed for such conditions The Executive Director of UNEP reported to the Governing Council in February 1992 concerning the Status of Desertification and Implementation of the United Nations Plan of Action to Combat Desertification PACD The Report concludes that major efforts to implement the PACD had gJne into supporting measures rather than concrete corrective field operations Little evidence of

Sahoo, 2001 Papers presented at the National Seminar on Conservation and Utilization of Medicinal and Aromatic Plants held at Bhubaneswar during 4-6 December 2001 in Indian context **Vetiveria** Massimo Maffei, 2002-01-17 Vetiveria is one of the most versatile genera in plant kingdom For example the species Vetiveria zizanioides produces odorous roots from which a precious essential oil is distilled and used in a variety of applications from perfumery to ethnopharmacology The same roots give the plant particular characteristics that make it a valuable natural barr Bioremediation and Bioeconomy Majeti Narasimha Vara Prasad, 2015-10-03 Bioremediation and Bioeconomy provides a common platform for scientists from various backgrounds to find sustainable solutions to environmental issues including the ever growing lack of water resources which are under immense pressure due to land degradation pollution population explosion urbanization and global economic development In addition large amounts of toxic waste have been dispersed in thousands of contaminated sites and bioremediation is emerging as an invaluable tool for environmental clean up The book addresses these challenge by presenting innovative and cost effective solutions to decontaminate polluted environments including usage of contaminated land and waste water for bioproducts such as natural fibers biocomposites and fuels to boost the economy Users will find a guide that helps scientists from various backgrounds find sustainable solutions to these environmental issues as they address the topical issues crucial for understanding new and innovative approaches for sustainable development Provides a compilation of new information on phytoremediation not found in other books in the present market The first book to link

phytoremediation and the bioeconomy Includes strategies to utilize contaminated soils for producing bioresources and co generation of value chain and value additions products Vetiver Grass John C. Greenfield,1990 This handbook has been prepared to support fieldworkers and farmers in developing vegetative systems of soil and moisture conservation that will meet the requirements of small farmers in developing countries most of whom reside in the tropics and semitropics Experience has shown that conventional systems of earth bunds or terraces on small farms are expensive and in many cases especially in modern times ineffective When applied correctly vegetative systems of soil and moisture conservation particularly the system of hedges of vetiver grass described in this handbook have proved cheaper and more effective

Sustainable Agriculture Reviews Eric Lichtfouse,2015-08-14 Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children Sustainable agriculture is a discipline that addresses current issues such as climate change increasing food and fuel prices poor nation starvation rich nation obesity water pollution soil erosion fertility loss pest control and biodiversity depletion Novel environmentally friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy soil science molecular biology chemistry toxicology ecology economy and social sciences Indeed sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries For that scientists use the system approach that involves studying components and interactions of a whole system to address scientific economic and social issues In that respect sustainable agriculture is not a classical narrow science Instead of solving problems using the classical painkiller approach that treats only negative impacts sustainable agriculture treats problem sources Because most actual society issues are now intertwined global and fast developing sustainable agriculture will bring solutions to build a safer world *Phytoremediation Potential of Perennial Grasses* D.P. Singh,Vimal Chandra Pandey,2020-03-27 Phytoremediation Potential of Perennial Grasses provides readers with the knowledge to select specific perennial grass species according to site specific needs In addition it demonstrates the potential opportunities for grass based phytoremediation to yield phytoproducts especially biomass based bioenergy and aromatic essential oils as a green economy while in the process of remediating contaminated sites The book brings together recent and established knowledge on different aspects of grass based phytoremediation providing this information in a single source that offers a cutting edge synthesis of scientific and experiential knowledge on polluted site restoration that is useful for both practitioners and scientists in environmental science and ecology Provides a holistic approach to grass based phytoremediation covering the ecological economic and social issues related to its management Addresses the key role that grass based phytoremediation plays in maintaining ecosystem services in polluted sites Includes strategies to mitigate costs related to the phytoremediation of polluted sites Disaster Risk Governance in India and Cross Cutting Issues Indrajit Pal,Rajib Shaw,2017-08-02 This book provides an analytical discussion of the status of disaster risk reduction and governance in an Indian context drawing

examples and lessons from the output of the national and regional level programs and projects and from other relevant experiences in the country Different types of disasters faced by Indian states are covered including geophysical and hydrometeorological hazards The book incorporates and draws upon some of the key lessons from the pre disaster phase through the disaster phase and finally to the post disaster phase thus establishing an effective framework in the form of key lessons learned The rich content of the book is based on contributions from various stakeholders from academicians and practitioners to decision makers and nongovernment organizations related to disaster risk management systems in an Indian context Special emphasis is given to analyzing field experiences from academic perspectives and pointing out key issues along with the relevance of risk governance of disaster risk reduction The book works as a comprehensive reference in disaster risk governance for disaster managers in India and other countries The book has 19 chapters organized into four parts Part I provides the outline and basics of disaster risk governance perspectives at the national level with supporting examples from a global point of view Part II specifically emphasizes the detailed perspectives on risk governance at the regional and local levels Part III is devoted to approaches and issues of disaster risk governance and development at various levels stressing the practices and clear examples of disaster risk governance policy options institutional organization risk reduction strategies and key lessons learned Finally Part IV highlights risk reduction and cross cutting issues focusing on risk mitigation and scientific intervention for disaster risk reduction
