The Visual Turn The Visual Turn

Angela Dalle Vacche

The Visual Turn The Visual Turn:

The Visual Turn Angela Dalle Vacche, 2003 This collection of essays demonstrates the usefulness of looking at cinema with the analytical methods provided by art theory The Visual Turn is a dialogue between art historians and film theorists from the silent period to the aftermath of World War II *The Visual Culture Reader* Nicholas Mirzoeff, 2002 The diverse essays collected here constitute an exploration of the emerging interdisciplinary field of visual culture and examine why modern and postmodern culture place such a premium on rendering experience in visual form **The Visual Turn and the Transformation of the Textbook** James A. LaSpina, 2014-04-04 Is the emerging digital multimedia culture of today transforming the textbook or forever displacing it As new media of transmission enter the classroom the traditional textbook is now caught up in a dialogue reshaping the textual boundaries of the book and with it the traditional modes of cognition and learning which are bound more to language than to visual form Most of the important work in the past two decades in the field of curriculum has focused on the culture of the textbook A rich literature has evolved around textbooks as the traditional object of instructional activity This volume is an important contribution to this literature which focuses on the actual making of a textbook This design process serves as a metaphor that suggests new paradigms of learning and instruction in which text content is but one component in a multidimensional information space The Visual Turn is an exploration along the border of this new learning space transforming the traditional center of instruction in the classroom

The Visual Turn Sandria Freitag, 2017-10-02 The Visual Turn South Asia Across the Disciplines explores new perspectives made possible by the evidence drawn from visual culture This evidence is utilized by historians literary analysts anthropologists and in a new way art historians Focusing on built environments within their urban contexts the interactions of buildings roads and bodies the meaning making achieved through consumption of images on their own or in concert with literary texts all contribute to a much broader and deeper understanding of change in South Asia Juxtaposed these case studies not only approach their topics in a multi disciplinary manner but also make clear just what scholars from various disciplines can learn from each other to add nuance and depth to their own analyses In the process the authors demonstrate how the application of different methods and theorizing when coupled with a fascinating range of types of evidence contribute to a significant broadening of our abilities to interpret the past and the present In particular these essays bring new ways of thinking about cities as well as the multiple ways that visual culture contributes to individual and collective forms of identity narratives that are negotiated at key moments of change in South Asia Readers will see their own materials and historicized contexts with new eyes This book was published as a special issue of South Asia Journal of South Asian Studies **Visual Culture: What is visual culture studies?** Joanne Morra, Marquard Smith, 2006 These texts represent both the formation of visual culture and the ways in which it has transformed and continues to transform our understanding and experience of the world as a visual domain The Pictorial Turn Neal Curtis, 2013-09-13 In 1992 W J T Mitchell argued

for a pictorial turn in the humanities registering a renewed interest in and prevalence of pictures and images in what had been understood as an age of simulation or an increasingly extensive and diverse visual culture. However in what is often characterized as a society of the spectacle we still do not know exactly what pictures or images are what their relation to language is how they operate on observers and the world how their history is to be understood and what is to be done with or about them. In this seminal collection of essays the first to be devoted to the pictorial turn theorists from across the humanities and social sciences representing the disciplines of art history philosophy geography media studies visual studies and anthropology are brought together with a paleontologist and practising artists to consider amongst other things the relation between pictures and images the power of landscape the nature of political images the status of images in the natural sciences the life of images and the pictorial uncanny. With these topics in mind picture theory and iconology exceed in scope the objects of visual culture conventionally understood. This book was published as a special issue of *Culture Theory and Critique*.

Visual Metaphors and Aesthetics Michalle Gal, 2022-05-19 This book offers a new definition of metaphor as an ontological and visual construction whose roots are external visual forms and its motivation is our attachment to forms. This definition which Michalle Gal names visualist challenges the ruling conceptualist theory of metaphors and places a new emphasis on how we experience rather than understand metaphors. In doing so she responds to the visual turn that is taking place in literature and the media demanding that the visual become a site of philosophical analysis. This focus on the external visual world allows Gal to employ visual

theories to capture the essence of metaphor She looks beyond conceptual or semantic mechanism and returns to theories of Arnheim and Gombrich and the current evolution of ideas about the visual or material and embodied cognition Proposing to see visual metaphors in their basic form she uses a new externalist terminology of ontology visuality composition affordance construction and emergence Setting out a new theory that takes into account that humans are visual no less than cognitive creatures Visual Metaphors and Aesthetics lays the foundation for a new vocabulary to talk about metaphors Defining Visual Rhetorics Charles A. Hill, Marguerite Helmers, 2012-08-21 Images play an important role in developing consciousness and the relationship of the self to its surroundings In this distinctive collection editors Charles A Hill and Marguerite Helmers examine the connection between visual images and persuasion or how images act rhetorically upon viewers Chapters included here highlight the differences and commonalities among a variety of projects identified as visual rhetoric leading to a more precise definition of the term and its role in rhetorical studies Contributions to this volume consider a wide variety of sites of image production from architecture to paintings from film to needlepoint in order to understand how images and texts work upon readers as symbolic forms of representation Each chapter discusses analyzes and explains the visual aspect of a particular subject and illustrates the ways in which messages and meaning are communicated visually The contributions include work from rhetoric scholars in the English and communication disciplines and represent a variety of methodologies theoretical textual analysis psychological research and cultural studies among others The editors seek to demonstrate that every new turn in the study of rhetorical practices reveals more possibilities for discussion and that the recent turn to the visual has revealed an inexhaustible supply of new questions problems and objects for investigation As a whole the chapters presented here demonstrate the wide range of scholarship that is possible when a field begins to take seriously the analysis of images as important cultural and rhetorical forces Defining Visual Rhetorics is appropriate for graduate or advanced undergraduate courses in rhetoric English mass communication cultural studies technical communication and visual studies It will also serve as an insightful resource for researchers scholars and educators interested in rhetoric cultural studies and communication studies

Johannes Westberg,Lukas Boser,Ingrid Brühwiler,2019-04-10 This book examines school acts in the long nineteenth century traditionally considered as milestones or landmarks in the process of achieving universal education Guided by a strong interest in social cultural and economic history the case studies featured in the book rethink the actual value the impact and the ostensible purpose of school acts The thirteen national case studies focus on the manner in which school acts were embedded in their particular historical contexts offering a comprehensive and multidisciplinary overview of school acts and the role they played in the rise of mass schooling Drawing together research from countries across the West the editors and contributors analyse why these acts were passed as well as their content and impact This seminal collection will appeal to students and scholars of school acts and the history of mass schooling Chapter 9 of this book is available open access under a CC BY 4 0 license at link springer com *Depicting Dante in Anglo-Italian Literary and Visual Arts* Christoph

Lehner,2017-05-11 In the course of 750 years Dante Alighieri has been made into a universally important icon deeply engrained in the world s cultural memory This book examines key stages of Dante s appropriation in Western cultural history by exploring the intermedial relationship between Dante s Divina Commedia the tradition of his iconography and selected historical literary and artistic responses from British artists in the 19th and 20th centuries The images and iconographies created out of Dantean appropriations almost always centre around the triad of allegory authority and authenticity These three important aspects of revisiting Dante are found in the Dantean image fostered in Florence in the 14th and 15th centuries and feature prominently in the works of Dante Gabriel Rossetti T S Eliot and Tom Phillips Their appropriation of Dante represents landmarks in the productive reception of the Florentine and is invariably linked to a tradition of Dante studies established in Britain during the middle of the 19th century For Dante Gabriel Rossetti the Florentine provides a model for Victorian Dantean self fashioning and becomes an allegory of authenticity and morality For T S Eliot Dante represents the voice of literary authority in Modernist poetry and serves as the allegory of a visionary European author For Tom Phillips the engagement with Dante and his text represents an intertextual and intermedial endeavour which provides him with a rich cultural tapestry of art thought and ideas on the Western world The main focus of this study therefore is on how Dante s image was fixed in the first 200 years of his appropriation in Florence how fruitfully the Dantean images and his text have been taken up and used for creative and intellectual production in Britain over the course of the past centuries and what moral literary or political messages they continue to convey Tomorrow on Cassette Benjamin Duester,2025-05-15

Growing sales numbers for cassette tapes in the Global North since the early 2010s have led mass media outlets to repeatedly proclaim a tape revival Yet the grassroots projects of devotees in niche punk noise and hip hop DIY music scenes have continuously upheld the unique material benefits of cassettes while wider society considered them a relic of bygone times Contrasting the popular notion of current cassette use being a mere side effect of the blazing interest in the vinyl record this book argues that the lasting embrace of tapes is based on complex cultural economic and material factors that shape cassettes as hybrid artefacts of music in the new media age Drawing on interviews with 85 experts active in DIY music cultures as independent record shop operators musicians event promoters fans and collectors across Japan Australia and the United States Tomorrow on Cassette presents a seminal exploration of how the cassette tape's significance as a tool for material expression creativity and sociality perseveres in the 21st century

Essays from the Edge Martin Jay, 2011-06-10 Over his distinguished career as a European intellectual historian and cultural critic Martin Jay has explored a variety of major themes the Frankfurt School the exile of German intellectuals in America during the Nazi era Western Marxism the denigration of vision in twentieth century French thought the discourse of experience in modern Europe and America and lying in politics Essays from the Edge assembles Jay's writings from the intersections of this intellectual journey Several essays focus on methodological debates in the humanities and social sciences the limits of interdisciplinarity the issue of national or universal philosophy cultural relativism and visuality and the implications of periodization in historical narrative Others examine the concept of scopophilic regime and the metaphors of revolution and the gardening impulse Among the theorists treated at length are Theodor Adorno Hannah Arendt Jacques Derrida and Michel Foucault The essays also include several of Jay's *Salmagundi* columns dealing with subjects as varied as the new Museum of Modern Art in New York the impact of Colin Wilson's *The Outsider* and the demise of the *Partisan Review* All of these efforts can be considered what Arthur Schopenhauer called to borrow the title of one of his most celebrated collections *parerga and paralipomena* As essays from the edges of major projects they illuminate Jay's major arguments elaborate points made only in passing in the larger texts and explore ideas farther than would have been possible given the focus of the larger works themselves The result is a lively diverse offering from an extraordinary intellect

Visual Culture Revisited Ralf Adelman, Andreas Fahr, Ines Katenhusen, Nic Leonhardt, Dimitri Liebsch, 2014-12-05 Is there one visual culture or are there multiple visual cultures On the one hand it is obvious that images do not exist and cannot be understood independently Rather they are embedded in institutions and cultural contexts This common ground suggests an understanding of visual culture as a singular phenomenon On the other hand the plurality of pictorial representations from sitcoms to illustrations in children's books from cartoons to satellite photos from high art to everyday life suggests the conception of visual culture as a singular phenomenon to be misleading The visual world is a field of conflict and tension between self and other mainstream and counterculture The articles in this book include both theoretical reflections on the dialectics of visual culture's as well as case studies The focus

lies on examples from the U S American context from the focusing on Native Americans as the Vanishing Race in the 19th century Photography to the TV coverage of the Columbia Space Shuttle Disaster in February 2003 This book is therefore highly recommendable to both students and scholars of American Studies als well as those interested in the interdisciplinary debate on visual culture s
