From Yoga to Kabbalah Véronique Altglas, 2014-05-01 Religious exoticism implies a deeply ambivalent relationship to otherness and to religion itself traditional religious teachings are uprooted and fragmented in order to be appropriated as practical methods for personal growth Western contemporary societies have seen the massive popularization of such exotic religious resources as yoga and meditation Shamanism Buddhism Sufism and Kabbalah Véronique Altglas shows that these trends inform us about how religious resources are disseminated globally as well as how the self is constructed in society She uses two case studies the Hindu based movements in France and Britain that started in the 1970s and the Kabbalah Centre in France Britain Brazil and Israel She draws upon major qualitative and cross cultural empirical investigations to conceptualize religious exoticism and offer a nuanced and original understanding of its contemporary significance From Yoga to Kabbalah broadens scholarly understanding of the

How Whole Brain Thinking Can Save the Future James Olson, 2017-01-10 When facing a tough dilemma the wise person tackles the whole problem They don t just focus on one part and ignore the rest That s a matter of common sense but such holistic thinking rarely occurs in our most consequential organizations Although women are catching up in the corridors of power most people in charge today are highly specialized males whose perception is too often myopic For example while they may focus well on the immediate symptoms of a problem they often miss deeper causes wider effects and longer term consequences Such people some of whom are also women are left brain dominant thinkers who tend to miss the forest for the trees Sadly these left brain dominants fail to use all the mental faculties available to them in particular the holistic and intuitive perceptions provided by their right brain And this is why our future is now in great peril In this multiple award winning book James Olson carefully explores these issues and shows us how to minimize conflict by gaining creative control over our two modes of

perception He goes on to describe the left brain bias in our civilization revealing it to be the root cause for centuries of war racism sexism exploitation and hyper polarization Left brain dominance also explains eons of misunderstanding between the sexes and our inability to understand LGBTQ variants of which there are as many as 32 fluid variations as Olson shows While most of our technological and scientific progress is driven by left brain thinking the great advances to come especially in ethics politics the arts and religion will require that we consciously harness both sides of our brain to greatly improve our thinking so we can more often reach agreement Independent scholar Olson concludes by explaining how we can achieve greater internal coordination between these two operating systems thus showing us how and why thinking with our whole brains will lead us to peace justice prosperity and to the ultimate healing of our relationships and our world *FACE2FAITH*
