The Viic Type U Boot:

The VIIC Type U-Boot Waldemar Góralski, Mieczysław Jastrzębski, 2011-03 The type VIIC was a slightly modified version of the successful VIIB. They had basically the same engine layout and power but were slightly larger and heavier which made them not quite as fast as the VIIB. 5 torpedo tubes, 4 at the bow and one at the stern, were installed in all but the following boats: only two bow tubes U 72, U 78, U 80, U 554 and U 555 and no stern tube U 203, U 331, U 351, U 401, U 431 and U 651. The VIIC was the workhorse of the German U boat force in World War Two from 1941 onwards and boats of this type were being built throughout the war. The first VIIC boat being commissioned was the U 69 in 1940. The VIIC was an effective fighting machine and was seen in almost all areas where the U boat force operated although their range was not as great as the one of the larger IX types. The VIIC came into service as the Happy Days were almost over and it was this boat that faced the final defeat to the Allied anti submarine campaign in late 1943 and 1944. Perhaps the most famous VIIC boat was the U 96 which is featured in the movie *Das Boot*. Other noticeable boats were the U flak boats. Many of these boats were fitted with the Schnorkel in 1944/1945. This design saw one more improvement in the type VIIC 41 boat. The larger mine laying type VIID was a direct variant of the VIIC.

German submarine U-1105 'Black Panther' Aaron Stephan Hamilton, 2019-06-27 Now in its final resting place at the bottom of the Potomac River in Maryland, the U Boat U 1105 is unique among German World War II submarines. Technologically innovative, it was the only U Boat to conduct a wartime patrol while equipped with the snorkel, GHG Balkon passive sonar and a rubberized coating known as Alberich designed to reduce its acoustic signature and hide from Allied sonar. After the end of World War II, it was the subject of intense testing and evaluation by the Allies before finally being sunk to the bottom of the Potomac River. This highly illustrated book uses many new and previously unpublished images to tell the full story of this remarkable U Boat, evaluating the effectiveness of its late war technologies, document its extensive postwar testing and detail all the features still present on the wreck site today.

U-Boat Attack Logs Bruce Taylor, Daniel Morgan, 2011-11-09 An indispensable reference work for anyone studying either the U boat campaign or WW2 at sea. Copiously illustrated, fascinating and harrowing. Navy News: During the Second World War, over 250 Allied warships from a dozen navies were sent to the bottom by German U boats. This ground breaking study provides a detailed analysis of every sinking for which source material survives from both the Allied and the German sides, resulting in detailed treatment of the fate of 110 vessels, with the remainder summarized in an extensive appendix. Uniquely, each entry is built around a specialist translation of the relevant segment of the war diary log of the U boat in question, taken directly from the surviving originals. Remarkably, this represents the first large scale publication of the U boat war diaries in any language. The book offers a wealth of new information, not only with respect to the circumstances of the sinkings from both the Allied and German perspectives, but also to the technical environment in which they lived, as well as the fate of the crews. The entries include background details on the vessels concerned and the men involved, with a selection of rare and carefully chosen

photos from archives and collections around the world Each entry is itself a compelling narrative but is backed with a list of sources consulted including documents published works and websites A decade in the making this is probably the most important book on the U boat war to be published for many a year Offers significant new information on many of the most famous incidents Maritime Advisor

First U-Boat Flotilla Lawrence Paterson,2001-08-01 Formed in 1935 First U Boat Flotilla operated against Hitler s enemies from the very earliest stage of the war through to September 1944 when disbanded amid the flames of Brest during the US siege Over seventy five per cent of operational U boats were lost as the Allies counter measures and code breaking successes took ever greater effect This fascinating work records the Flotilla s successes and disasters in detail

Building for Battle: U-Boat Pens of the Atlantic Battle Philip Kaplan,2018-03-30 The only thing that ever really frightened me during the war was the U boat peril Prime Minister Winston Churchill Churchill as a former First Lord of the Admiralty was well versed in the importance of Britain protecting itself at sea In the opening years of the Second World War Germanys U boat submarine fleet was tasked with attacking and destroying the supply ships that Britain depended upon for its survival The U boats were under the command of Grand Admiral Karl Doenitz who for much of the war effectively guided that strategy There was a very real possibility that the British people would starve if the U boats succeeded in their campaign When France fell to the German forces in 1940 Hitlers Ubootwaffe gained a significant asset in five important ports along the Brittany coast Brest Lorient St Nazaire La Palce and Bordeaux The use of these ports put Germanys submarine force hundreds of miles closer to the action in the North Atlantic the routes of the Allied supply convoys which were operating mainly between Halifax Nova Scotia and various English port cities This afforded the U boats several more days at sea on their deadly patrols than was possible while they had been based in Germany and German occupied Norway In this new publication from Philip Kaplan the massive bunkers or pens constructed in Brittany by the laborers of the German Organisation Todt are revisited These giant structures some of which sheltered more than a dozen submarines at a time still exist because they were built with concrete ceilings more than three meters thick With equally impressive supporting walls they suffered relatively little damage in the wartime bombing raids of the Royal Air Force and the US Eighth Army Air Force Illustrated with more than 150 rare and compelling photo images this book is a richly rewarding journey back across time to some of the most intriguing and electrifying sites from the war years The story of the pen shelters and their part in that war is both fascinating and enduring

Encyclopedia of British Submarines 1901-1955 Paul Akermann,2002-11 The history of the development of submarines covered in this book spans the most tumultuous years of the 20th century When the little Holland No 1 was launched in 1901 few could guess that the submarine would become the most potent weapon of war ever developed

Sunderland vs U-boat Mark Lardas,2023-10-26 An illustrated examination of the role played by the Sunderland as an antisubmarine aircraft during the Battle of the Atlantic focusing on the key battles of the Biscay campaign in 1943 44 The Sunderland is an iconic British aircraft of World War II and the only RAF Coastal

Command type to perform frontline service throughout the conflict Its prime target the German U boat was a deadly adversary to Allied warships and other oceangoing vessels but proved vulnerable to detection and air attacks from the radar equipped Sunderland This book examines the respective advantages and drawbacks of these two maritime predators by providing a vivid analysis of their historic engagement during the Biscay campaign in 1943 44 Drawing upon first hand accounts of this famous duel Mark Lardas tells the story of how highly skilled Sunderland crews took the fight to an often elusive enemy and helped RAF Coastal Command defeat the U boat threat Maps tactical diagrams photographs and specially commissioned artwork bring the action to life as the Sunderland s losses and eventual victory in the Bay of Biscay play out in fascinating insightful detail Hidden Warships Nicholas A. Gregory Owen,2006 Recalls the experiences of Karl Baumann who joined the German Merchant Marine as a cabin boy at the age of fourteen in 1939 Baumann enlisted in the German Navy or Kriegsmarine in 1941 and served as an anti aircraft gunner in the submarine service until his surrender to American forces in 1944 Describes Baumann s internment at the prisoner of war camp at Lyndhurst Virginia his repatriation to Germany and his subsequent emigration to Virginia in 1951

The U-Boat War Ian Baxter,2009-03-09 2 20PM Directly in front of us I sighted four funnels and the masts of a passenger steamer at right angles to our course coming from the SW and going towards Galley Head 3 10 PM Torpedo shot at a distance of 700 meters below the surface from the log of the German submarine U 20 The explosion that followed changed history as the date of the ship s log was may 7 1915 the steamer was the Lusitania and the torpedo sent 1195 innocent men women and children to a watery grave In 1914 U Boats were a new and untried weapon and when such a

weapon can bring a mighty empire to the brink of defeat there is a story worth telling Edwyn Gray's *The U Boat War* is the history of the Kaiser's attempt to destroy the British Empire by a ruthless campaign of unrestricted submarine warfare. It opens with Germany's first tentative experiments with the submarines and climaxes with the naval mutiny that helped bring down the Kaiser. In between is a detailed account of a campaign of terror which by April 1917 had the British Empire on the verge of surrender. The cost in lives and equipment was staggering. On the German side 4894 sailors and 515 officers lost their lives in action. 178 German Submarines were destroyed by the allies, 14 were scuttled and 122 surrendered. According to the most reliable sources 5 708 ships were destroyed by the U Boats and 13 333 non combatants perished in British Ships. World figures for civilian casualties were never released. *The U Boat War* is a savage but thrilling account of men fighting for their lives beneath the sea and of the boats that changed the face of naval warfare.

Canadian Warbird Survivors Harold A. Skaarup, 2000. The purpose of this handbook is to provide aviation enthusiasts with a handbook on where to find the surviving retired military aircraft preserved in Canada. The majority of the Canadian Warbird and War Prize Survivors are on display within a significant number of aviation museums. Many others are displayed as gate guards on or near a number of Canadian and Allied Armed Forces Bases and installations. There are also a few in the hands of private owners and collectors that have been restored to flying status. These include a number of foreign warbird survivors that were brought back to Canada as War Prizes. The museum staffs and volunteer organizations such as the Canadian Aviation Preservation Association (CAPA) have done tremendous work in preserving military and civilian aircraft that have been a major part of Canada's aviation heritage. A few of these aircraft are illustrated in this book along with a short description of the aircraft flown by Canadian servicemen and women. The aircraft are listed alphabetically along with a city or museum location, the manufacturer, aircraft serial number and call sign where known. *Canadian Warbird and War Prize Survivors* is part of a series on aircraft used by the Canadian Forces throughout its history.

Churchill's Greatest Fear Richard Doherty, 2015-11-30. The Battle of the Atlantic. Churchill's term was arguably the pivotal campaign of the Second World War; it was certainly the longest, starting with the sinking of RMS *Athenia* on 3 September 1939 and ending with the torpedoing of SS *Avon Dale* on 7 May 1945. This superbly researched work covers all the major aspects of The Battle, balancing the initial advantages of Admiral Doenitz's U Boat force, the introduction of the convoy system, the role of the opposing surface fleets and air forces, relative strengths and the all important technical developments. Intelligence, particularly the Bletchley Park intercepts, played an increasingly important part in the final outcome. The author concludes that May 1943 was the moment when the Allies seized the initiative and despite desperate German efforts never lost their advantage. Using official records, personal accounts and a wealth of historical research, this work gives the reader a splendidly concise yet broad account of the course of the campaign, the men

who fought it on both sides and the critical moments and analysis of the outcome

Royal Air Force Coastal Command John Campbell, 2013-10-20 Royal Air Force Coastal Command was the organisation charged with keeping the sea lanes clear around the coasts of Britain for the best part of half a century from immediately after the First World War until the 1960s In the decades after the Second World War John Campbell served as a Coastal Command navigator and crew captain on Shackleton aircraft in the Maritime Patrol role Having studied in great detail the history and development of Coastal Command he has researched and written this thorough account of its activities throughout its years of operation

The Maritime Archaeology of a Modern Conflict Innes McCartney, 2014-10-24 Over the last 30 years hydrographical marine surveys in the English Channel helped uncover the potential wreck sites of German submarines or U boats sunk during the conflicts of World War I and World War II Through a series of systemic dives nautical archaeologist and historian Innes McCartney surveyed and recorded these wrecks discovering that the distribution and number of wrecks conflicted with the published histories of U boat losses Of all the U boat war losses in the Channel McCartney found that some 41% were heretofore unaccounted for in the historical literature of World War I and World War II This book reconciles these inaccuracies with the archaeological record by presenting case studies of a number of dives conducted in the English Channel Using empirical evidence this book investigates possible reasons historical inconsistencies persist and what Allied operational and intelligence based processes caused them to occur in the first place This book will be of interest to scholars and researchers in the fields of nautical archaeology and naval history as well as wreck explorers

Duel in the Deep David L. Sears, 2023-09-15 In Autumn 1943 the Battle of the Atlantic World War II's longest seagoing campaign reached a new crescendo Anti submarine aircraft and ships using new tactics technologies and weaponry dominated a seascape where German U boats once ruled supreme But then unexpectedly in eerie mid ocean darkness an elemental hull to deck sailor to submariner duel erupted On Halloween Eve U S Navy destroyer Borie an outmoded thin skinned tin can of World War I vintage set out alone to track down an elusive U boat Borie had thus far toiled in the war's backwaters her crew of young reservists anxious to prove its mettle When Borie trapped U 405 on the surface that chance arrived As Borie's deck guns unleashed withering fire and U 405's skipper angled his submarine to launch torpedoes Borie's young skipper a salesman in civilian life resorted to the original and once the only means of sinking a submarine ramming full speed ahead consequences be damned Borie's slashing collision with U 405 ignited a

swashbuckling no holds barred brawl of cannons machine guns small arms and even knives and spent shell casings In the wreckage strewn aftermath desperate sailors on both sides fought for survival in a heaving frigid unforgiving sea Duel in the Deep weaves together high stakes strategy and lethal gamesmanship with poignant human backstories pounding air surface subsurface action epic heroism and wrenching sacrifice A former U S Navy officer and tin can veteran now a seasoned widely published and highly acclaimed military historian portrays a rousing high seas showdown reminiscent of fighting in the age of sail
