Casper,2022-03-18 The U S infant mortality rate is among the highest in the industrialized world and Black babies are far more likely than white babies to die in their first year of life Maternal mortality rates are also very high Though the infant mortality rate overall has improved over the past century with public health interventions racial disparities have not Racism poverty lack of access to health care and other causes of death have been identified but not yet adequately addressed The tragedy is twofold it is undoubtedly tragic that babies die in their first year of life and it is both tragic and unacceptable that most of these deaths are preventable Despite the urgency of the problem there has been little public discussion of infant loss The question this book takes up is not why babies die we already have many answers to this question It is rather who cares that babies mostly but not only Black and Native American babies are dying before their first birthdays More importantly what are we willing to do about it This book tracks social and cultural dimensions of infant death through 58 alphabetical entries from Absence to ZIP Code It centers women s loss and grief while also drawing attention to dimensions of infant death not often examined It is simultaneously a sociological study of infant death an archive of loss and grief and a clarion call for social change **Economics** J.
