J. Brown, Nick Lo, Rob Allen, 2008-11-30 From rather humble beginnings as the Personal Home Page scripting language PHP has found its way into almost every server corporation and dev shop in the world On an average day somewhere between 500 000 and 2 million coders do something in PHP Even when you use a well understood language like PHP building a modern web application requires tools that decrease development time and cost while improving code quality Frameworks such as

Ruby on Rails and Django have been getting a lot of attention as a result. For PHP coders the Zend Framework offers that same promise without the need to move away from PHP. This powerful collection of components can be used in part or as a whole to speed up the development process. Zend Framework has the backing of Zend Technologies, the driving force behind the PHP programming language in which it is written. The first production release of the Zend Framework became available in July of 2007. *Zend Framework in Action* is a comprehensive tutorial that shows how to use the Zend Framework to create web based applications and web services. This book takes you on an over the shoulder tour of the components of the Zend Framework as you build a high quality real world web application. This book is organized around the techniques you'll use every day as a web developer: data handling, forms, authentication, and so forth. As you follow the running example, you'll learn to build interactive Ajax driven features into your application without sacrificing nuts and bolts considerations like security and performance. This book is aimed at the competent PHP developer who wants to master framework driven web development. *Zend Framework in Action* goes beyond the docs but still provides quick access to the most common topics encountered in the development of web applications. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

Building PHP Applications with Symfony, CakePHP, and Zend Framework Bartosz Porebski, Karol Przystalski, Leszek Nowak, 2011-02-17. The first detailed unbiased comparison of the three leading PHP frameworks. Web developers have been eager for an impartial comparison of leading PHP frameworks so they can make educated decisions about the most effective tool for their needs. This guide uses Symfony, CakePHP, and Zend Framework to solve key problems, providing source code examples and comparisons for each. It explains the approach and reviews the similarities and differences in the three frameworks, providing reliable information on which to base your decisions. Symfony, CakePHP, and Zend Framework are considered the leading PHP frameworks; developers need an unbiased comparison to choose which one works best for their individual situations. This guide uses each framework to solve the same problems, illustrating the solutions with source code examples and working applications. Covers wide range of topics from installation and configuration to most advanced features like AJAX web services and automated testing. Includes an appendix of new PHP frameworks including CodeIgniter, Lithium, and Agavi. Bestselling PHP author Elizabeth Naramore serves as technical editor. *Comparison of PHP Web Frameworks* provides the impartial side by side comparison that developers have been looking for.
