Suarez founder and senior tactical instructor of his department's Tactical Rifle Team exposes the myths that have long kept the rifle from being considered for use in urban policing. In addition, he details the many advantages the rifle affords the inner city police officer or SWAT operator in a wide range of deployment situations and presents innovative techniques that are replacing the traditional ones among agencies that have adopted the rifle. As we progress into the 21st century, the rifle is likely to become an increasingly integral part of the police officer's tool bag. This book will serve as a valuable guide to police tactical riflemen making their jobs easier and safer as they make the criminal's job more difficult and hazardous. **FBI Law Enforcement Bulletin**, 2005

Domestic fortress Rowland Atkinson, Sarah Blandy, 2016-11-04 Today's home is a kind of fortress that tells us as much about our need for privacy as it does about ensuring our security. Fortress homes, gated communities, and elaborate defensive systems have become everyday features of urban life, highlighting the depth of fear as well as the desire for prestige and social display and the ideological strength of home ownership. This book offers a fresh analysis of our homes, our demands for security, and anxieties about invasion, loss, and finding seclusion in a worrying and divided world. Using a rich range of sources from cutting edge research to media accounts, the book considers the fantasies and realities of dangers to the contemporary home and its inhabitants and details the extreme measures now used in the pursuit of total safety. **Forthcoming Books** Rose Army, 1998-04

Leflet, Curtis L. Porter, 2013-08-01 Target shooting is about placing your shots in the center of a small target. The penalty for not doing so is a poor score. Tactical shooting is about stopping someone from shooting you. The penalty of not being able to do this is the loss of your own life. J. Henry FitzGerald

Shooting 1930 In Advanced Handgun Survival Tactics authors Dave Leflet and Curtis Porter demonstrate why most of what is being taught today about tactical shooting is not just worthless but also dangerous To combat this they drew on their years of tactical shooting experience in law enforcement and the military along with proven scientific and medical research to create their own training program for developing and maintaining tactical readiness for law enforcement officers and civilians interested in combat shooting Their tactical training system which they call the Porter method is a reality based approach to handgun shooting The tactical skills they teach are based on combat shooting techniques that have been repeatedly field tested and proven during actual combat by gunfighters combat veterans military instructors and law enforcement officers They are not based on police firearms training because most police training is badly flawed and unsafe for people who attempt to use it in the real world One common mistake people make is believing that shooters who can punch holes in paper targets have the skills they need to prevail in a real shoot out where the targets are shooting back They are dead wrong There are no second place winners in tactical shooting You have people who survive and people who die This book teaches shooting techniques that can help you survive Though it is primarily about handgun shooting the authors have included a bonus chapter on tactical shotgun shooting for special situations Tactical Reality Louis Awerbuck,1999-11-01 Louis Awerbuck is one of America s premier firearms trainers and instructors He firmly believes that training and tactics are the most crucial elements in determining how people respond in a real fight This book brings together a decade of articles by Awerbuck in S W A T and Soldier of Fortune magazines on subjects ranging from creative target systems and firearms marksmanship under stress to defensive survival of a deadly force encounter But above all the book is intended to promote thought on surviving a fight in an increasingly deteriorating society Tactical Reality is not for the person who looks for trouble where he could have avoided it It is not for the man who shuns cover and takes an unnecessary bullet It is not for the squeamish or anyone who isn t prepared to fight to defend himself or his family It is for everyone interested in finding out how to take a realistic approach to training so that if need be he can turn the tactical odds in a gunfight in his favor This book proves that you are what you practice
