The Wizards Of Ozymandias Reflections On The Decline And Fall:

Wizards of Ozymandias Butler D. Shaffer, 2012-06 Butler Shaffer has over the course of several years written 51 essays observing the dissolution of Western culture and civilization They have been assembled here as his reflections on the decline and fall of Western civilization

The Classical Liberal Case for Israel Walter E. Block, Alan G. Futerman, 2021-11-02 This book offers a unique perspective on the State of Israel based on classical liberalism both on a historical and theoretical level Specifically it makes a classical liberal and libertarian analysis based upon homesteading and private property rights to defend the State of Israel As such this work explores the history of the Jewish State both to provide a positive case for its right to exist and to clarify the myths surrounding its origin and development At the same time it deals with other relevant related subjects such as the complex situation between Israel and the Palestinian Arabs the military campaigns against the Jewish State the connection between anti Zionism and anti Semitism and Israel s economic miracle The thorough analysis presented in this work intends to show not only why the voices and movements against Israel are wrong including the Boycott Divestment and Sanctions movement BDS but more importantly why Israel is an example of human flourishing and freedom that every advocate for liberty should celebrate The Classical Liberal Case for Israel makes the practical and moral case for Israel It is based on truths and facts that need to be repeated over and over Block Futerman understand that the only way to defeat a big lie is with a big truth Benjamin Netanyahu Prime Minister of the State of Israel Jerusalem Israel

Classical Liberalism often associated with the spread West from Northern Europe in creating free nations is argued here as applying to Israel with ancient roots in the principles of human freedom Vernon L Smith Ph D Nobel Prize in Economic Sciences 2002 and Professor George L Argyros Endowed Chair in Finance and Economics Professor of Economics and Law Smith Institute for Political Economy and Philosophy at Chapman University

Water Capitalism Walter E. Block, Peter L. Nelson, 2015-10-30 Water covers some 75% of the earth s surface while land covers 25% approximately Yet the former accounts for less than 1% of world GDP the latter 99% plus Part of the reason for this imbalance is that there are more people located on land than water But a more important explanation is that while land is privately owned water is unowned with the exception of a few small lakes and ponds or governmentally owned rivers large lakes This gives rise to the tragedy of the commons when something is unowned people have less of an incentive to care for it preserve it and protect it than when they own it As a result we have oil spills depletion of fish stocks threatened extinction of some species e g whales shark attacks polluted and dried up rivers misallocated water unsafe boating piracy and other indices of economic disarray which if they had occurred on the land would have been more easily identified as the result of the tragedy of the commons and or government ownership and mismanagement The purpose of this book is to make the case for privatization of all bodies of water without exception In the tragic example of the Soviet Union the 97% of the land owned by the state accounted for 75% of the crops On the 3% of the land privately owned 25% of the crops were grown The obvious mandate requires that we

privatize the land and prosper The present volume applies this lesson in detail to bodies of water
