Your Private Sky R Buckminster Fuller Discourse:

Your Private Sky Richard Buckminster Fuller, 2001 This title which complements the volume *Your Private Sky The Art of Design Science* see page 44 gives an authentic insight into the development of Fuller's architectonic technical anthropological concepts Fuller was the epitome of the poet as engineer the thinker as designer the artist as researcher He left behind a voluminous quantity of writing including texts of visionary importance penetrating linguistic force as well as of urgent topicality The book documents various aspects of Fuller's widely respected texts These testaments were intended to be shared with the whole world or as Fuller coined it in 1950 with *Spaceship Earth* 3 7643 6072 0 [Your Private Sky](#)

Joachim Krausse, 2000 **New Views on R. Buckminster Fuller** Hsiao-yun Chu, Roberto G. Trujillo, 2009 In this book leading scholars in architecture design history and communications discuss the work of R Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century **The Fourth Dimension and Non-Euclidean**

Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak **Games and**

Play in the Creative, Smart and Ecological City Dale Leorke, Marcus Owens, 2020-12-30 This book explores what games and play can tell us about contemporary processes of urbanization and examines how the dynamics of gaming can help us understand the interurban competition that underpins the entrepreneurialism of the smart and creative city *Games and Play in the Creative Smart and Ecological City* is a collection of chapters written by an interdisciplinary group of scholars from game studies media studies play studies architecture landscape architecture and urban planning It situates the historical evolution of play and games in the urban landscape and outlines the scope of the various ways games and play contribute to

the city's economy, cultural life, and environmental concerns. In connecting games and play more concretely to urban discourses and design strategies, this book urges scholars to consider their growing contribution to three overarching sets of discourses that dominate urban planning and policy today: the creative and cultural economies of cities, the smart and playable city, and ecological cities. This interdisciplinary work will be of great interest to students and scholars of game studies, play studies, landscape architecture, and allied design fields, urban geography, and art history. Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9781003007760> **Impossible Heights** Adnan

Morshed, 2015-01-15. The advent of the airplane and skyscraper in the 1920s and 30s America offered the population an entirely new way to look at the world from above. The captivating image of an airplane flying over the rising metropolis led many Americans to believe a new civilization had dawned. In *Impossible Heights*, Adnan Morshed examines the aesthetics that emerged from this valorization of heights and their impact on the built environment. The lofty vantage point from the sky ushered in a modernist impulse to cleanse crowded twentieth-century cities in anticipation of an ideal world of tomorrow. Inspired by great new heights, American architects became central to this endeavor and were regarded as heroic aviators. Combining close readings of a broad range of archival sources, Morshed offers new interpretations of works such as Hugh Ferriss's *Metropolis*, drawings, Buckminster Fuller's Dymaxion houses, and Norman Bel Geddes's *Futurama* exhibit at the 1939 New York World's Fair. Transformed by the populist imagination into master builders, these designers helped produce a new form of visuality, the aesthetics of ascension. By demonstrating how aerial movement and height intersect with popular superhero discourses of the time, Morshed reveals the relationship between architecture, art, science, and interwar pop culture. Featuring a marvelous array of never-before-published illustrations, this richly textured study of utopian imaginings illustrates America's propulsion into a new cultural consciousness. **New Makers of Modern Culture** Justin Wintle, 2016-04-22. *New Makers of Modern Culture* will be widely acquired by both higher education and public libraries. Bibliographies are attached to entries, and there is thorough cross-referencing.

The Experimenters Eva Díaz, 2014-12-25. In the years immediately following World War II, Black Mountain College, an unaccredited school in rural Appalachia, became a vital hub of cultural innovation. Practically every major artistic figure of the mid-twentieth century spent some time there: Merce Cunningham, Ray Johnson, Franz Kline, Willem de Kooning, Robert Motherwell, Robert Rauschenberg, Dorothea Rockburne, Aaron Siskind, Cy Twombly; the list goes on and on. Yet scholars have tended to view these artists' time at the College as little more than prologue, a step on their way to greatness. With *The Experimenters*, Eva Díaz reveals the importance of Black Mountain College and especially of three key teachers: Josef Albers, John Cage, and R. Buckminster Fuller, to be much greater than that. Díaz's focus is on experimentation; Albers, Cage, and Fuller she shows taught new models of art-making that favored testing procedures rather than personal expression. These methodologies represented incipient directions for postwar art practice.

elements of which would be sampled and often wholly adopted by Black Mountain students and subsequent practitioners. The resulting works which interrelate art and life in a way that imbues these projects with crucial relevance not only reconfigured the relationships among chance, order and design, they helped redefine what artistic practice was and could be for future generations. Offering a bold, compelling new angle on some of the most widely studied creative figures of modern times, *The Experimenters* does nothing less than rewrite the story of art in the mid twentieth century. *The Concise New Makers of Modern Culture* Justin Wintle, 2008-11-28. A Who's Who of Western culture from Woody Allen to Emile Zola. Containing four hundred essay style entries and covering the period from 1850 to the present, *The Concise New Makers of Modern Culture* includes artists, writers, dramatists, architects, philosophers, anthropologists, scientists, sociologists, major political figures, composers, film makers and many other culturally significant individuals and is thoroughly international in its purview. Next to Karl Marx is Bob Marley, with John Ruskin is Salman Rushdie, alongside Darwin is Luigi Dallapiccola, Deng Xiaoping rubs shoulders with Jacques Derrida as do Julia Kristeva and Kropotkin. With its global reach, *The Concise New Makers of Modern Culture* provides a multi-voiced witness of the contemporary thinking world. The entries carry short bibliographies and there is thorough cross referencing as well as an index of names and key terms. **New Makers of Modern Culture** Wintle Justin, 2013-05-13. *New Makers of Modern Culture* is the successor to the classic reference works *Makers of Modern Culture* and *Makers of Nineteenth Century Culture* published by Routledge in the early 1980s. The set was extremely successful and continues to be used to this day due to the high quality of the writing, the distinguished contributors and the cultural sensitivity shown in the selection of those individuals included. *New Makers of Modern Culture* takes into full account the rise and fall of reputation and influence over the last twenty five years and the epochal changes that have occurred: the demise of Marxism and the collapse of the Soviet Union, the rise and fall of postmodernism, the eruption of Islamic fundamentalism, the triumph of the Internet. Containing over eight hundred essay style entries and covering the period from 1850 to the present, *New Makers* includes artists, writers, dramatists, architects, philosophers, anthropologists, scientists, sociologists, major political figures, composers, film makers and many other culturally significant individuals and is thoroughly international in its purview. Next to Karl Marx is Bob Marley, next to John Ruskin is Salmon Rushdie, alongside Darwin is Luigi Dallapiccola, Deng Xiaoping runs shoulders with Jacques Derrida, Julia Kristeva with Kropotkin. Once again Wintle has enlisted the services of many distinguished writers and leading academics such as Sam Beer, Bernard Crick, Edward Seidensticker and Paul Preston. In a few cases, for example Michael Holroyd and Philip Larkin, contributors are themselves the subject of entries. With its global reach, *New Makers of Modern Culture* provides a multi-voiced witness of the contemporary thinking world. The entries carry short bibliographies and there is thorough cross referencing. There is an index of names and key terms. *Cultural Techniques* Bernhard Siegert, 2015-05-01. In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process and reflect the distinctions fundamental

for a given culture Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics Rather Siegert seeks to relocate media and culture on a level where the distinctions between object and performance matter and form human and nonhuman sign and channel the symbolic and the real are still in the process of becoming The result is to turn ontology into a domain of all that is meant in German by the word Kultur Cultural techniques comprise not only self-referential symbolic practices like reading writing counting or image making The analysis of artifacts as cultural techniques emphasizes their ontological status as in between's shifting from first-order to second-order techniques from the technical to the artistic from object to sign from the natural to the cultural from the operational to the representational Cultural Techniques ranges from seafaring drafting and eating to the production of the sign signal-distinction in old and new media to the reproduction of anthropological difference to the study of trompe l'oeils grids registers and doors Throughout Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic Grounding posthumanist theory both historically and technically this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses

The Myofascial System in Form and Movement Lauri Nemetz, 2022-12-21 The field of myofascial science is changing rapidly In *The Myofascial System in Form and Movement* Lauri Nemetz invites readers into the rich dialogue around movement delving into anatomy concepts of space and the many other disciplines that are taking interest in the myofascial universe Nemetz uses insights from our spatial relationship with the world to examine the human body giving voice to the ideas and work of leaders in this area and prompting readers to develop their own ideas as well as offering application suggestions to discover in your own body or with others With an extensive background in art history myofascial movement anatomical dissection and more Nemetz uses her wealth of experience to weave together the many facets of this evolving area in a visually rich and thought-provoking book

The Ideal of Total Environmental Control Suzanne Strum, 2017-10-19 Finalist for the Thought and Criticism category of the FAD Awards 2019 This book traces the ideal of total environmental control through the intellectual and geographic journey of Knud L. Nberg Holm a forgotten Danish architect who promoted a unique systemic cybernetic and ecological vision of architecture in the 1930s A pioneering figure of the new objectivity and international constructivism in Germany in 1922 and a celebrated peer of radical figures in De Stijl the Bauhaus and Russian constructivism when he emigrated to Detroit in 1923 he introduced the vanguard theory of productivism through his photography essays designs and pedagogy By following L. Nberg Holm's ongoing matrix of relations until the postwar era with the European vanguards in CIAM and former members of the Structural Study Associates SSA especially Fuller Frederick Kiesler and C. Theodore Larson this study shows how their definition of building as a form of environmental control anticipated the contemporary disciplines of industrial ecology industrial metabolism and energy

accounting *You Belong to the Universe* Jonathon Keats, 2016-03-01 You Belong to the Universe documents Buckminster Fuller's six decade quest to make the world work for one hundred percent of humanity Jonathon Keats sets out to restore Fuller's good name placing Fuller's philosophy in a modern context Keats argues that Fuller's life and ideas namely doing the most with the least is now more relevant than ever as we struggle to meet the demands of an exploding world population with finite resources **Cultural Urban Heritage** Mladen Obad Šćitaroci, Bojana Bojanić Obad Šćitaroci, Ana Mrđa, 2019-01-28 This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective It discusses identifying historical current and possible future models for the revival and enhancement of cultural heritage taking into consideration three factors respect for the inherited contemporary and sustainable future development The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement methods improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural and in particular architectural heritage Cultural heritage is perceived primarily through conservation but that comes with limitations If heritage is perceived and experienced solely through conservation it becomes a static object It needs to be made an active subject which implies life in heritage as well as new purposes and new life for abandoned heritage Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community To achieve this it should be developed in accordance with contemporary needs and technological achievements but on scientifically based and professional criteria and on sustainable models The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments case studies and theory **Dreams of disconnection** Fanny Lopez, 2021-06-24 Why do we live in homes and communities built around the century old industrial model of large service networks that use polluting resources For more than a century creative architects and planners have dreamed of decentralisation and self sufficient living not to cut themselves off from society but to invent new modes of consumption and to rethink collective public services around common environmental values In a time of climate crisis changing society means changing energy infrastructures Dreams of disconnection tells the story of this strand of design and planning from its pioneers in the late nineteenth century to those applying similar ideas to tomorrow's technology two hundred years later Lopez takes in many a utopian visionary in her tour of dreamers of disconnection from theorists and architects to industrialists and engineers Technology and design are the centrepieces for these projects and their complexity particularly around sustainable supplies of energy food and water so often find solutions in aesthetics Whether these models were based around single homes or whole cities Dreams of disconnection reveals that there is much to be learnt and marvelled at in the history of self sufficient design **Tools for Ideas** Christian Gänschert, 2012-10-11 Architects today must position themselves within an extremely wide ranging field of qualifications This makes it all the more important to have a fresh introduction to the field that makes up one of their core competences the field of design This introductory presentation

describes and analyzes the theories strategies and tools of creative design for the purposes of practical work With thoughtfulness and expertise it opens the reader s eyes to the processes that underlie design and demonstrates different ways of communicating about complex design work The first section focuses on the much discussed relationship between design and research between architecture and the sciences The second section describes basic design approaches from Vitruvius and Alberti through Erwin Panofsky and Wolfgang Kemp to Otl Aicher and Vil m Flusser The third and largest section presents the elementary tools of design from gestures and words through drawings models and simulations to critique all as instruments of creative design in architecture and its related fields

Capsules: Typology of Other

Architecture Peter Šenk, 2017-10-12 This book investigates the architectural product design and urban typology of the capsule which beginning in the 1960s broadened the concept of the basic building blocks of architecture to include a minimal living unit called the capsule Here it is presented with regard to the continuity of the development of the Modern Movement its revisionist criticism pioneering examples as well as contemporary examples and uses The typology of the capsule allows us to consider this theme in terms of the architecture of resistance with the potential to search for an other architecture that is embedded in our contemporaneity manifested in small dwellings composite structures and container units shelters and mobile homes in nature and the urban environment technology transfer in high tech designs devices additions and extensions etc The concept of the capsule as a building element of architecture as well as a spatial element can therefore be regarded as having a generative potential for an architecture of personal space for the individual forcing us to reflect on our existing living and dwelling conditions

Kant for Architects Diane Morgan, 2017-09-11 This book introduces architects to a philosopher Immanuel Kant whose work was constantly informed by a concern for the world as an evolving whole According to Kant in this interconnected and dynamic world humans should act as mutually dependent and responsible subjects Given his future oriented and ethico politically concerned thinking Kant is a thinker who clearly speaks to architects This introduction demonstrates how his ideas bear pertinently and creatively upon the world in which we live now and for which we should care thoughtfully Kant grounded his enlightened vision of philosophy s mission using an architectural metaphor of the modest dwelling house Far from constructing speculative castles in the sky or vertiginous towers which reach to the heavens he tells us that his humble aim is rather to build a secure home for ourselves one which appropriately corresponds at once to the limited material resources available on our planet and to our need for firm and solid principles to live by This book also explores Kant s notions of cosmopolitics which attempts to think politics from a global perspective by taking into account the geographical fact that the earth is a sphere with limited land mass and natural resources Given the urgent topicality of sustainable development these Kantian texts are of particular interest for architects of today Students of architecture who are necessarily trained in negotiating between theory and practice gain much from considering Kant whose critical project also consisted of testing and exploring the viability of ideas so as to ascertain to what extent and crucially how

ideas can have a constructive effect on the whole world and on us as active agents therein **Modern Architectural Theory** Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism
