Topographic Maps Study Guide

LEARNING TARGETS:

- I understand the purpose of a topographic map and what the lines on it represent.
- I can use a topographic map to figure out the shape of land and identify features
- Given two labeled contour lines, I can figure out the contour interval of a topographic map.

VOCAB

Topographic Map
Elevation
Contour Interval
Contour Line

Steep
Flat
Cliff
River

Hilltop
Valley
Ridge

** Remember that the closer the contour lines are to each other, the more steep the land is and the further away the lines are, the less steep the land is.*

** To figure out the contour interval of a map, find the difference in elevation between two labeled contour lines. Then, divide the difference by the number of lines between the two elevations.*

Map Reading Skills, Grades 5 - 8 Shireman, 2012-01-03 Get your GPS going with students in grades 5-8 using Map Reading Skills. The activities in this 80-page book provide students with ample opportunities to practice and apply map skills. Map and diagram exercises and hands-on activities reinforce skills. This book includes reproducible maps and a special section on GPS and its uses and it highlights essential vocabulary in bold. The book aligns with state, national, and Canadian provincial standards. *Resources for Teaching Middle School Science* Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age-appropriate inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. *Resources for Teaching Middle School Science* developed by the National Science Resources Center (NSRC) is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of *Resources for Teaching Elementary School Science*, the first in the NSRC series of annotated guides to hands-on inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn; a list of accompanying materials; a reading level; and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs; chapters on books about science and teaching; directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents. *Resources in Education*, 2001-04 **Earth Science MCQ (Multiple Choice Questions)** Arshad
