

Using the HT46R12 in an Induction Cooker

D/N : HA0101E

Introduction

The HT46R12 and HT46R14 are two devices from Holtek's A/D series of MCUs. These two MCUs each include an integrated PPG (Programmable Pulse Generator) function. By having this on-chip hardware PPG module, the devices are very suitable for induction cooker product applications. In addition to having the PPG function, these two MCU devices also include 2K×14 / 4K×15 of Program Memory, 88×8 / 192×8 of Data Memory, 16/20 bi-directional I/O lines, a 4.8 Channel 9-bit ADC, two comparators and two 8-bit programmable time/divent counters with PFD functions.

In this application note, the HT46R12 MCU will be used as the central component in the control of the induction cooker. The basic operation will be discussed together with the circuit control method.
