Parris, 2012-12-06 PROFESSOR SIR KENNETH L STUART Pain control has become one of medicine's most rapidly growing disciplines and I welcome the opportunity to write this foreword to a book that I am sure will make its own unique contribution to advancing this discipline My pleasure in writing it is heightened by my pride in the fact that its editor was at one time an undergraduate student of mine at the University of the West Indies in Jamaica One of the uncertainties teachers always face is that they can never predict how their charges will turn out This uncertainty has been happily resolved Dr Parris professional career has been marked by the same dedication and commitment that characterized his undergraduate days and that clearly has been brought to the preparation of this scholarly and practical work Pain relief has been until recently a comparatively neglected field Its neglect was determined not so much by lack of professional awareness of its importance

but mainly because so little could be done about it in the past
