Utopia Or Auschwitz Germanys 1968 Generation And The Holocaust Crises In World Politics:

Utopia Or Auschwitz Hans Kundnani, 2009 One thing above all separated the radical students who demonstrated on the streets of West Berlin and Frankfurt in 1968 from their counterparts in Berkeley or New York In the US the baby boomers grew up in the shadow of what Tom Brokaw called the greatest generation In its place Germany had the so called Auschwitz generation What became known in Germany as the 68 generation or just the Achtundsechziger had grown up knowing that their mothers and fathers were directly or indirectly responsible for Nazism and in particular for the Holocaust Germany's 1968 generation did not merely dream of a better world as some of their contemporaries in other countries did they felt compelled to act to save Germany from itself It was an all or nothing choice Utopia or Auschwitz Kundnani shows that the struggle of Germany's 68 generation also had a darker side Although the Achtundsechziger imagined their struggle against capitalism in West Germany as resistance against Nazism they also had a tendency to see Auschwitz everywhere and by using images and metaphors connected with Nazism to describe events in other parts of the world they relativized Nazism and in particular the Holocaust Even more disturbingly despite the anti fascist rhetoric of the Achtundsechziger there were also anti Semitic and nationalist currents in the West German New Left that grew out of the student movement Utopia or Auschwitz traces the political journey of Germany's post war generation and examines the influence that its ambivalent attitude to the Nazi past had on the foreign policy of the red green government between 1998 and 2005 which included several former members of the student movement like Joschka Fischer The red green government's schizophrenic foreign policy manifested its response to the crises in Kosovo Afghanistan and Iraq reflected the 1968 generation's ambivalent attitude to the Nazi past

Deliberate Ignorance Ralph Hertwig, Christoph Engel, 2021-03-02 Psychologists economists historians computer scientists sociologists philosophers and legal scholars explore the conscious choice not to seek information The history of intellectual thought abounds with claims that knowledge is valued and sought yet individuals and groups often choose not to know We call the conscious choice not to seek or use knowledge or information deliberate ignorance When is this a virtue when is it a vice and what can be learned from formally modeling the underlying motives On which normative grounds can it be judged Which institutional interventions can promote or prevent it In this book psychologists economists historians computer scientists sociologists philosophers and legal scholars explore the scope of deliberate ignorance

The Paradox of German Power Hans Kundnani, 2015 Since the Euro crisis began Germany has emerged as Europe's dominant power During the last three years German Chancellor Angela Merkel has been compared with Bismarck and even Hitler in the European media And yet few can deny that Germany today is very different from the stereotype of nineteenth and twentieth century history After nearly seventy years of struggling with the Nazi past Germans think that they more than anyone have learned its lessons Above all what the new Germany thinks it stands for is peace Germany is unique in this combination of economic assertiveness and military abstinence So what does it mean to have a

German Europe in the twenty first century In *The Paradox of German Power* Hans Kundnani explains how Germany got to where it is now and where it might go in future He explores German national identity and foreign policy through a series of tensions in German thinking and action between continuity and change between normality and abnormality between economics and politics and between Europe and the world War from the Ground Up Emile Simpson, 2013 This is a philosophical treatise on war written by an Oxford grad who served in Afghanistan **Theory and Application of the "Generation" in International Relations and Politics** B. Steele, J. Acuff, 2011-12-15 The generation has been largely forgotten in the fields of sociology and political science especially regarding global politics This volume re engages the concept of a generation utilizing it to explore how it can help us understand a variety of processes and patterns in International Relations and Comparative Politics Authoritarian Liberalism and the Transformation of Modern Europe Michael A. Wilkinson, 2021 Oxford Constitutional Theory has rapidly established itself as the primary point of reference for theoretical reflections on the growing interest in constitutions and constitutional law in domestic regional and global contexts The majority of the works published in the series are monographs that advance new understandings of their subject But the series aims to provide a forum for further innovation in the field by also including well conceived edited collections that bring a variety of perspectives and disciplinary approaches to bear on specific themes in constitutional thought and by publishing English translations of leading monographs in constitutional theory that have originally been written in languages other than English Book jacket **International Relations as Politics among People** Hannes Hansen-Magnusson, 2019-11-25 Pioneering a hermeneutic methodology for analyses of global governance this is the first monograph that makes Hans Georg Gadamer's and Paul Ricoeur's hermeneutic philosophy relevant for global politics research Drawing on the concept of horizon as the element that captures the dynamics of understanding in social interaction in order to analyse processes of international politics this book shows that what is required is the embeddedness of meanings and ideas in human action and reflection By advancing theory building with regard to particular questions of global governance it reconceptualises international relations as politics among people Providing a contextualised constructivist approach that highlights the importance of processes to which people are central it challenges the use of collective concepts such as state and nation as units of analysis which continue to dominate international relations but which cloud the details of interaction processes The two case studies of UN Convention on the Law of the Sea and Germany in NATO's mission Operation Allied Force in Kosovo in 1999 are structured around this contextualised constructivist approach developed in the monograph The studies reveal how interaction processes can be made accountable leading to new vantage points of our understanding of governance problems This book will be of interest to scholars interested in global governance the work of Hans Georg Gadamer Paul Ricoeur and hermeneutic philosophy the UN humanitarian interventions and foreign policy analysts *Der Kampf um Chinas kollektives Gedächtnis* Anja Blanke, 2021-04-19 Seit dem Tode Mao Zedongs im Jahr 1976 kämpft die Kommunistische Partei

Chinas um einen innerparteilichen und gesellschaftlichen Konsens zum Umgang mit ihren eigenen historischen Fehlern Immer wieder werden offizielle Narrative sowohl durch zivilgesellschaftliche Akteure als auch aus dem Inneren der Partei heraus in Frage gestellt bzw kritisiert Anhand der Entwicklung unterschiedlicher offizieller und inoffizieller Narrative zur Kampagne gegen Rechtsabweichler 1957 1958 lässt sich erkennen dass der Kampf um das kollektive Gedächtnis insbesondere im China unter Xi Jinping eine langanhaltende zentrale politische Herausforderung für die nachhaltige Stabilisierung der Herrschaftslegitimation der KPCh darstellt
