An Introduction to Geographical Economics Steven Brakman,Harry Garretsen,Charles van Marrewijk,2001-12-06 The need for a better understanding of the role location plays in economic life was first and most famously made explicit by Bertil Ohlin in 1933 However it is only

recently with the development of computer packages able to handle complex systems as well as advances in economic theory in particular an increased understanding of returns to scale and imperfect competition that Ohlin's vision has been met and a framework developed which explains the distribution of economic activity across space This book is an integrated non mathematical first principles textbook presenting geographical economics to advanced students Never avoiding advanced concepts its emphasis is on examples diagrams and empirical evidence making it the ideal starting point prior to monographic and journal material Contains copious computer simulation exercises available in book and electronic format to encourage learning and understanding through application Uses case study material from North America Europe Africa and Australasia
