fascinating account of the life and times of Jean Aberbach the elusive music publishing legend who with his brother Julian built one of music history s most powerful popular music publishing companies Hill and Range Songs During the 1940s and 1950s music publishers rather than artists and record companies controlled the American hit making machine Using corporate records Aberbach s daybooks and extensive interviews with top performers and songwriters Biszick Lockwoodweaves an adventure story thatdemystifies this occupation showing how Aberbach s keen insights behind the scenes manipulations and bold business moves fundamentally changed the music industry and nurtured the careers of some

of America's biggest popular performers and songwriters. The Austrian-born Aberbach brothers overtook their American competitors, capturing entire genres of music to build a privately owned international empire of song while at the same time affording songwriters unmatched control over their work. This business model resulted in more than three hundred chart hits and the first ever song royalties being paid to songwriters and performers, including Bill Monroe and the Sons of the Pioneers. Biszick Lockwood also brings new intriguing material to the story of Elvis Presley, who shared ownership with the Aberbachs in two music publishing companies throughout his entire career.

**The Giant Leap** Caleb Scharf, 2025-10-21

A leading astrobiologist argues that space travel is an evolutionary event at least as important as life's first journey from sea to land. The story of life has always been one of great transitions of crossing new frontiers. The dawn of life itself is one, so too is the first time two cells stuck together rather than drifting apart. And perhaps most dramatic were the moves from the sea to land, land to air. Each transition has witnessed wild storms of innovation, opportunity, and hazard. It might seem that there are no more realms for life to venture. But there is one space. In *The Giant Leap*, astrobiologist Caleb Scharf argues that our journey into space isn't simply a giant leap for humankind; it's life's next great transition, an evolution of evolution itself. Humans and our technology are catalysts for an interplanetary transformation, marking a disruption in the story of life as fundamental as life's movement from sea to land and land to sky. Inspired by Darwin's account of his journey on the *Beagle* and packed with stories from the past, present, and future of space travel, *The Giant Leap* thrills at both life's creativity and the marvels of technology that have propelled us into the cosmos. And it offers an awesome glimpse of the grander vistas that wait in the great beyond.
