The big reset revised edition Willem Middelkoop,2015-12-11 A system reset seems imminent The world s financial system will need to find a new anchor before the year 2020 Since the beginning of the credit crisis the US realized the dollar will lose its role as the world s reserve currency and has been planning for a monetary reset According to Willem Middelkoop this reset will be designed to keep the US in the driver s seat allowing the new monetary system to include significant roles for other currencies such as the euro and China s renminbi Prepare for the coming Reset In all likelihood gold will be re introduced as one of the pillars of this next phase in the global financial system The prediction is that gold could be revalued at 7 000 per troy ounce By looking past the American smokescreen surrounding gold and the dollar long ago China and Russia have been accumulating massive amounts of gold reserves positioning themselves for a more prominent role in the future to come The reset will come as a shock to many The Big Reset will help everyone who wants to be fully prepared This fully revised edition of Middelkoop s book takes into account developments since its original publication which have only strengthened the case for the coming return of gold How Credit Crises Happen Barbara
