TPM in Process Industries Tokutaro Suzuki, 1994-05-01 Process industries have a particularly urgent need for collaborative equipment management systems but until now have lacked for programs directed toward their specific needs. TPM in Process Industries brings together top consultants from the Japan Institute of Plant Maintenance to modify the original TPM Development Program. In this volume they demonstrate how to analyze process environments and equipment issues including process loss structure and calculation, autonomous maintenance, equipment and process improvement, and quality maintenance. For all organizations managing large equipment facing low operator machine ratios or implementing extensive improvement, this text is an invaluable resource. Desarrollo de sistema de mantenimiento basado en TPM para la industria automotriz, 2015 Actualmente las empresas del sector automotriz se encuentran en un ambiente de competitividad que ha permeado todo el planeta. El crecimiento y el desarrollo de la industria automotriz han obligado a las industrias navegar e investigar sobre la aplicación de nuevas herramientas y técnicas para lograr mejores resultados en cada uno de los procesos productivos. Anteriormente, hablar de técnicas y metodologías del mantenimiento era exclusivo de grandes empresas transnacionales; ahora, en este momento, estos puntos se han adherido a cualquier tipo de industria que busque permanecer en el ambiente laboral y aquel tipo de industria que busque optimizar su rentabilidad. Las estrategias como TPM, Mantenimiento productivo total, que su principal característica se basa en el involucramiento escalonado desde la gerencia hasta los operadores, RCM, Mantenimiento centrado en la confiabilidad, su principal fuerza cae en generar optimización en los programas de mantenimiento provocando beneficios en la mejora de la eficiencia de los equipos a través de un enfoque de criticidad hacia la funcionalidad. WCM, World Class Manufacturing, busca la excelencia operativa a través de metodologías y de la aplicación de rigor y estrategias enfocadas. Excelencia operativa que sea resultado de una ruta de éxito con un sistema y una voz. La investigación estoy convencido de que va a proveer un sistema de mantenimiento innovador y con enfoque que en beneficio de la industria amalgama las metodologías TPM, RCM y WCM. En ella se detallan las herramientas y prácticas a seguir con la finalidad. El alcance de esta práctica es para la industria.
