Traité De Logique Formelle:

Louis Couturat -Traité de Logique algorithmique Oliver Schlaudt,Mohsen Sakhri,2010-06-02 Louis Couturat 1868 1914 was an outstanding intellectual of the turn of the nineteenth to the twentieth century He is known for his work in the philosophy of mathematics for his critical and editorial work on Leibniz for his attempt to popularise modern logic in France for his commitment to an international auxiliary language as well as for his extended correspondence with scholars and mathematicians from Great Britain the United States Italy and Germany From his correspondence we know of four unpublished manuscripts on logic and its history which were largely complete and some of which must have been of considerable size We publish here for the first time in a critical edition the only one of these manuscripts that has been rediscovered the *Traité de Logique algorithmique* presumably written in the years 1899 1901 It is a highly interesting document of the academic reception and popularisation of symbolic logic in France It provides evidence of the discussions and controversies which accompanied the creation of logic as a new branch of science At the same time it completes the picture of Couturat's work which has been opened up to systematic study by the publication of important parts of his correspondence during the last decade We append the article on Symbolic Logic of 1902 which Couturat wrote in collaboration with Christine Ladd Franklin for Baldwin's *Dictionary of Philosophy and Psychology*

Traité de logique générale et de logique formelle. 2. vols** Charles Renouvier,1912 *Premier essai, Traité de logique générale et de logique formelle* Charles Renouvier,1912 **essai. Traité de logique générale et de logique formelle** Charles Renouvier,1875 **Louis Couturat: The History of Modern Symbolic Logic and Other French Manuscripts** Oliver Schlaudt,Anne-Francoise Schmid,2021-09-16 This volume features a critical edition of the recently rediscovered manuscripts written by the French philosopher Louis Couturat 1868 1914 It includes the transcriptions of three of his believed to be lost manuscripts first the *Cours de Caen* 1898 99 on various systems of symbolic logic second his lecture at the Collège de France *Histoire de la logique formelle moderne* and third his textbook on mathematical logic The manuscripts document the early reception of mathematical logic in France and provide insights into the first introduction of the French reader to the work of Gottlob Frege and Bertrand Russell It is the aim of the editors of this volume to contribute to the history of symbolic logic particularly the history of its dissemination and its teaching in France At the same time the volume contributes to an alternative history and conception of philosophy in which semiotics and concrete mathematical practice stand in focus The book is interesting for students and researchers in the history of philosophy mathematics and logic

Rediscovering Léon Brunschvicg's Critical Idealism Pietro Terzi,2022-01-13 Léon Brunschvicg's contribution to philosophical thought in fin de siècle France receives full explication in the first English language study on his work Arguing that Brunschvicg is crucial to understanding the philosophical schools which took root in 20th century France Pietro Terzi locates Brunschvicg alongside his contemporary Henri Bergson as well

as the range of thinkers he taught and influenced including Levinas Merleau Ponty de Beauvoir and Sartre Brunschvicg's deep engagement with debates concerning spiritualism and rationalism neo Kantian philosophy and the role of mathematics in philosophy made him the perfect supervisor for a whole host of nascent philosophical ideas which were forming in the work of his students Terzi outlines Brunschvicg's defence of neo Kantian judgement historical analysis and the inextricability of the natural and humanist sciences to any rigorous system of philosophy with wide ranging implications for contemporary scholarship Essais de critique générale. 1er essai: Traité de logique générale et de logique formelle Charles Bernard J. Renouvier, 1875 *The Oxford Handbook of Modern French Philosophy*, 2024-06-25 French philosophy is an internationally celebrated national philosophical tradition and this Oxford Handbook offers a comprehensive approach to its history since 1800 The Handbook features essays written by renowned international specialists illuminating key movements and positions themes and thinkers in nineteenth twentieth and even twenty first century French philosophy The volume takes into account developments in recent historical scholarship by broadening the notion of Modern French Philosophy in two ways Whereas recent approaches in the field have often ignored early nineteenth century developments this volume offers comprehensive treatment of French thought of this period in order to grasp better later developments Moreover the volume extends the canon at the other end of the period of Modern French Philosophy by including work on philosophers who have come to prominence only in the last ten or twenty years The volume takes French philosophy in a broad sense to include all philosophy carried out in France over the last 200 years and it illuminates the institutional and cultural background of this national philosophical tradition in such a way as to provide a fuller and more comprehensive understanding of its unity and of its more famous moments in the twentieth century **Library Bulletin**, 1878
