Developing Standards-Based Report Cards Thomas R. Guskey, Jane M. Bailey, 2009-11-17 Guskey and Bailey offer realistic solutions to improving how educators communicate a student's academic progress to all stakeholders. Their work provides a faculty with the research step by step guidelines and reporting templates to begin the dialogue to develop a standards based report card. Without a doubt this work is a model for schools that want to improve their system of grading and reporting. It certainly has transformed ours. Jeffrey Erickson, Assistant Principal, Minnetonka High School, MN. Develop standards based report cards that are meaningful to students, parents, and educators. Although schools have moved toward standards based curriculum and instruction, grading practices and reporting systems have remained largely unchanged. Helping school leaders gain support for transitioning from traditional to standards based report cards, this book guides educators in aligning assessment and reporting practices with standards based education and providing more detailed reports of children's learning and achievement. A standards based report card breaks down each subject area into specific elements of learning to offer parents and educators a more thorough description of each child's progress toward proficiency. This accessible volume provides a clear framework for developing standards based report cards. Shows how to communicate with parents, students, and other stakeholders about changes. Illustrates how to achieve grading consistency without increasing teachers' workloads or violating their professional autonomy. Filled with examples of standards based report cards that can be adapted to a school's needs, this practical resource shows district and school administrators how to establish reporting practices that facilitate learning.

The Writing Report Card Arthur N. Applebee, Judith A. Langer, Ina V. S. Mullis, 1986. Based on the National Assessment of Educational Progress (NAEP) 1984 assessment of the writing achievement of American school children, this report presents national and demographic subgroup achievement results for students in grades four, eight, and eleven and discusses students' attitudes toward writing and instruction. The first chapter describes the tasks and evaluation criteria used in the study and highlights results of the study, including the following:

1. although many students appeared to know the basic elements of analytic writing, such writing was difficult for students in all grades;
2. while most students could express their points of view in persuasive writing, many had difficulty providing evidence for those viewpoints;
3. students had less difficulty with tasks requiring short responses based on personal experience;
4. students found it moderately difficult to write well developed stories;
5. home environment is related to writing achievement;
6. students who indicated writing three or more reports and essays during a 6 week period had higher achievement levels than students who reported not writing during that time period;
7. students' positive attitudes toward writing deteriorate steadily across the grades;
8. students reported that their teachers are more likely to mark mistakes than to show an interest in what they write or to make suggestions for the next paper; and
9. content area writing increases between grades four and eight and decreases again in senior high school.

The next four chapters provide specific achievement data by grade level for informative, persuasive, and imaginative writing, and for writing performance among various demographic subgroups. The remaining three

chapters focus on students responses to questions concerning writing and writing instruction specifically their values and attitudes toward writing how they manage the writing process and what they write and the help they receive HTH **'Could Do Better'** Michael Wootton,1997 *Teachers' Messages for Report Cards* Maria Elena M.
