Congress. Senate. Committee on Homeland Security and Governmental Affairs. Permanent Subcommittee on Investigations,2011 [Signature Wounds](#) David Kieran,2019-04-02 The surprising story of the Army's efforts to combat PTSD and traumatic brain injury The wars in Iraq and Afghanistan have taken a tremendous toll on the mental health of our troops In 2005 then Senator Barack Obama took to the Senate floor to tell his colleagues that many of our injured soldiers are returning from Iraq with traumatic brain injury which doctors were calling the signature wound of the Iraq War Alarming stories of veterans taking their own lives raised a host of vital questions Why hadn't the military been better prepared to treat post traumatic stress disorder PTSD and traumatic brain injury TBI Why were troops being denied care and sent back to Iraq Why weren't the Army and the VA doing more to address these issues Drawing on previously unreleased documents and oral histories David Kieran tells the broad and nuanced story of the Army's efforts to understand and address these issues challenging the popular media view that the Iraq War was mismanaged by a callous military unwilling to address the human toll of the wars The story of mental health during this war is the story of how different groups soldiers veterans and their families anti war politicians researchers and clinicians and military leaders approached these issues from different perspectives and with different agendas It is the story of how the advancement of medical knowledge moves at a different pace than the needs of an Army at war and it is the story of how medical conditions intersect with larger political questions about militarism and foreign policy This book shows how PTSD TBI and suicide became the signature wounds of the wars in

Iraq and Afghanistan how they prompted change within the Army itself and how mental health became a factor in the debates about the impact of these conflicts on US culture *Public Health in the Arab World* Samer Jabbour,2012-03-08

Science...Again? Martin Braund,2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons **Campbell-Walsh Urology E-Book** Alan J.
