web what is a tensor let V be a finite dimensional vector space 1 it could be $\mathbb{R}^n$ it could be the tangent space to a manifold at a point or it could just be an abstract vector space a k tensor is a map $T: V \times \dots \times V \rightarrow \mathbb{R}$ where there are k factors of V that is linear in each factor 2 that is for each $v_i \in V$

web incisive self contained account of tensor analysis and the calculus of exterior differential forms interaction between the concept of invariance and the calculus of variations emphasis is on analytical techniques with large number of problems from

routine manipulative exercises to technically difficult assignments

tensors differential forms and variational principles - Jan 24 2022

web beginning with simple physical examples the theory of tensors and forms is developed by a process of successive abstractions this enables the reader to infer generalized principles from concrete situations departing from the traditional approach to tensors and forms in terms of purely differential geometric concepts
