private public dichotomy of liberal constitutionalism which relegates religion to the private sphere It argues that in ex colonial societies like India which are foundationally and diversely religious the courts need to work through and engage with the difficulties and complexities posed by their continual encounter with the question of religion rather than re affirming the myth of separation of law and myth state and religion This work demonstrates that any other approach leads to its repression and resultant reemergence in various forms Such an approach of working through religious categories will be effective in the struggle against religious fanaticism that has seen a resurgence in contemporary times The book will be a valuable resource for students and academics working in law religious studies history and political science **EduGorilla SSC GD Constable**
