3D Printing, Intellectual Property and Innovation Rosa Maria Ballardini, Marcus Norrgård, Jouni Partanen, 2016-04-24 3D printing or more correctly additive manufacturing is the general term for those software driven technologies that create physical objects by successive layering of materials Due to recent advances in the quality of objects produced and to lower processing costs the increasing dispersion and availability of these technologies have major implications not only for manufacturers and distributors but also for users and consumers raising unprecedented challenges for intellectual property protection and enforcement This is the first and only book to discuss 3D printing technology from a multidisciplinary perspective that encompasses law economics engineering technology and policy Originating in a collaborative study spearheaded by the Hanken School of Economics the Aalto University and the University of Helsinki in Finland and engaging an international consortium of legal design and production engineering experts with substantial contributions from industrial partners the book fully exposes and examines the fundamental questions related to the nexus of intellectual property law emerging technologies 3D printing business innovation and policy issues Twenty five legal technical and business experts contribute sixteen peer reviewed chapters each focusing on a specific area that collectively evaluate the tensions created by 3D printing technology in the context of the global economy The topics covered include current and future business models for 3D printing applications intellectual property rights in 3D printing essential patents and technical standards in additive manufacturing patent and bioprinting private use and 3D printing copyright

licences on the user generated content UGC in 3D printing copyright implications of 3D scanning and non traditional trademark infringement in the 3D printing context Specific industrial applications including aeronautics automotive industries construction equipment toy and jewellery making medical devices tissue engineering and regenerative medicine are all touched upon in the course of analyses In a legal context the central focus is on the technology s implications for US and European intellectual property law anchored in a comparison of relevant laws and cases in several legal systems This work is a matchless resource for patent copyright and trademark attorneys and other corporate counsel innovation economists industrial designers and engineers and academics and policymakers concerned with this complex topic

Paradigm Shift in International Economic Law Rule-Making Julien Chaisse, Henry Gao, Chang-fa Lo, 2017-11-13 The TPP was negotiated among 12 economically diverse countries including some most highly developed and rich countries i e the United States Japan Australia Canada New Zealand and Singapore some newly industrialized countries i e Mexico and Malaysia and some less developed countries i e Peru Chile and Vietnam A new paradigm created in this context is that countries with vastly different economic developments can actually agree on a set of very high standards to regulate their economic activities to liberalize their trade and to protect intellectual property and foreign investment The contents of the TPP also reflect its status of being a new paradigm as the 21st Century Trade Agreement and being a pioneer in rule making in many key regulatory areas These include not only the improved and enhanced rules on traditional issues already covered by the WTO such as goods services and IP rights but also the carefully designed rules in areas that have never been addressed in the WTO or comprehensively covered in other FTAs such as state owned enterprises electronic commerce and labor and environmental issues Although the United States has withdrawn from the TPP the remaining countries are still putting efforts into establishing a TPP without the United States or a TPP with China Economically speaking the current 11 parties account for about 20 % of the global economy If such agreement is put into force there will be significant implications for the region for the multilateral system and even for other FTAs The book addresses the potential of the TPP to change the ways trade and investments are conducted and argues for its potential to be the start of an international trade economic law revolution The book elaborates the relationship between the TPP and other existing trade agreements such as the WTO and other FTAs and explains how the TPP is to deal with traditional and new issues Taken together the authors argue that the implications of the TPP go beyond its current membership It is hoped that the book will make an important contribution to the field of international economic law
