Sexual Violence during War and Peace J. Boesten, 2014-04-16 Using the Peruvian internal armed conflict as a case study this book examines wartime rape and how it reproduces and reinforces existing hierarchies Jelke Boesten argues that effective responses to sexual violence in wartime are conditional upon profound changes in legal frameworks and practices institutions and society at large

War and the Politics of Ethics Maja Zehfuss, 2018 Contemporary Western war is represented as enacting the West's ability and responsibility to help make the world a better place for others in particular to protect them from oppression and serious human rights abuses That is war has become permissible again indeed even required as ethical war At the same time however Western war kills and destroys This creates a paradox Western war risks killing those it proposes to protect This book examines how we have responded to this dilemma and challenges the vision of ethical war itself exploring how the commitment to ethics shapes the practice of war and indeed how practices come in turn to shape what is considered ethical in war The book closely examines particular practices of warfare such as targeting the use of cultural knowledge and ethics training for soldiers What emerges is that instead of constraining violence the commitment to ethics enables and enhances it The book argues that the production of ethical war relies on an impossible but obscured separation between ethics and politics that is the problematic politics of ethics and reflects on the need to make decisions at the limit of ethics

Death by Design Peter Beale, 2016-07-22 At the outbreak of war in 1939 British tank crews were ill equipped under trained and badly led As a consequence the lives of hundreds of crewmen were wasted unnecessarily This was due not only to the poor design and construction of British tanks but also to the lack of thought and planning on the part of successive pre war governments and the War Office *Death by Design* explores how and why Britain went from leading the world in tank design at the end of the First World War to lagging far behind the design quality of Russian and German tanks in the Second World War This book is a much needed warning to governments and military planners a nation must always be prepared to defend itself and ensure that its soldiers are equipped with the tools to do so

Morality and War David Fisher, 2011-03-03 With the ending of the strategic certainties of the Cold War the need for moral clarity over when where and how to start conduct and conclude war has never been greater There has been a recent revival of interest in the just war tradition But can a medieval theory help us answer twenty first century security concerns David Fisher explores how just war

thinking can and should be developed to provide such guidance His in depth study examines philosophical challenges to just war thinking including those posed by moral scepticism and relativism It explores the nature and grounds of moral reasoning the relation between public and private morality and how just war teaching needs to be refashioned to provide practical guidance not just to politicians and generals but to ordinary service people The complexity and difficulty of moral decision making requires a new ethical approach here characterised as virtuous consequentialism that recognises the importance of both the internal quality and external effects of agency and of the moral principles and virtues needed to enact them Having reinforced the key tenets of just war thinking Fisher uses these to address contemporary security issues including the changing nature of war military preemption and torture the morality of the Iraq war and humanitarian intervention He concludes that the just war tradition provides not only a robust but an indispensable guide to resolve the security challenges of the twenty first century

War and Moral Injury Robert Emmet Meagher, Douglas A. Pryer, 2018-04-03 All royalties from the sale of this book are being donated to Warfighter Advance <http://www.warfighteradvance.org> Moral Injury has been called the signature wound of today's wars It is also as old as the human record of war as evidenced in the ancient war epics of Greece India and the Middle East But what exactly is Moral Injury What are its causes and consequences What can we do to prevent or limit its occurrence among those we send to war And above all what can we do to help heal afflicted warriors This landmark volume provides an invaluable resource for those looking for answers to these questions Gathered here are some of the most far ranging authoritative and accessible writings to date on the topic of Moral Injury Contributors come from the fields of psychology theology philosophy psychiatry law journalism neuropsychiatry classics poetry and of course the profession of arms Their voices find common cause in informing the growing international conversation on war and war's deepest and most enduring invisible wound Few may want to have this myth challenging truth telling conversation but it is one we must have if we truly wish to help those we send to fight our wars

The Character of War in the 21st Century Caroline Holmqvist-Jonsäter, Christopher Coker, 2009-12-04 This edited volume addresses the relationship between the essential nature of war and its character at the beginning of the twenty first century The focus is on the conflicts in Iraq and Afghanistan situations that occupy a central role in international affairs and that have become highly influential in thinking about war in the widest sense The intellectual foundation of the volume is Clausewitz's insight that though war has an enduring nature its character changes with time space social structure and culture The fact that war's character varies means that different actors may interpret experience and ultimately wage war differently The conflict between the ways that war is conceptualised in the prevailing Western and international discourse and the manner in which it plays out on the ground is a key discussion point for scholars and practitioners in the field of international relations Contributions combine insights from social theory philosophy sociology and strategic studies and ask directly what contemporary war is and what the implications are for the future This book will be of much interest to students of war studies strategic studies security

studies and IR in general Caroline Holmqvist Jonster is currently completing a PhD in the conflation of war and policing in international conflicts at the Department of War Studies King's College London Christopher Coker is Professor of International Relations at the London School of Economics and Political Science LSE He is the author of 11 books on war and security issues
