#### GENERAL

These condensing units are designed for outdoor installation on a roof or at ground level. Every unit is completely piped and wired at the factory and is shipped ready for immediate installation. Only the liquid and suction lines to the evaporator coil, the control wiring and the main power wiring are required to complete the installation. Each unit is dehydrated, evacuated, leak tested and pressure tested at 450 psig before being pressurized with a holding charge of refrigerant-22 for shipment and/or storage.

All controls are located in the front of the unit and are readily accessible for maintenance, adjustment and service. All wiring (power and control) can be made through the front of the unit. Refer to Table 7 for condenser cooling capacities and power requirements.

#### REFERENCE

This instruction covers the installation and operation of the basic condensing unit. For information on the installation and operation of the evaporator blower units, refer to instruction Form 550.23-N2Y.

Additional information on the design, installation, operation and service of this equipment is available in the following reference forms:

- ❖ 55.70-N1- General Installation
