Topology Via Logic Topology Via Logic:

Topology Via Logic Steven Vickers, 1989 Now in paperback Topology via Logic is an advanced textbook on topology for computer scientists Based on a course given by the author to postgraduate students of computer science at Imperial College it has three unusual features First the introduction is from the locale viewpoint motivated by the logic of finite observations this provides a more direct approach than the traditional one based on abstracting properties of open sets in the real line Second the methods of locale theory are freely exploited Third there is substantial discussion of some computer science applications Although books on topology aimed at mathematics exist no book has been written specifically for computer scientists As computer scientists become more aware of the mathematical foundations of their discipline it is appropriate that such topics are presented in a form of direct relevance and applicability This book goes some way towards bridging the gap

TOPOLOGY VIA LOGIC Steven Vickers, 1989 **The Quantum of Explanation** Randall E. Auxier, Gary L. Herstein, 2017-03-31 The Quantum of Explanation advances a bold new theory of how explanation ought to be understood in philosophical and cosmological inquiries Using a complete interpretation of Alfred North Whitehead's philosophical and mathematical writings and an interpretive structure that is essentially new Auxier and Herstein argue that Whitehead has never been properly understood nor has the depth and breadth of his contribution to the human search for knowledge been assimilated by his successors This important book effectively applies Whitehead's philosophy to problems in the interpretation of science empirical knowledge and nature It develops a new account of philosophical naturalism that will contribute to the current naturalism debate in both Analytic and Continental philosophy Auxier and Herstein also draw attention to some of the most important differences between the process theology tradition and Whitehead's thought arguing in favor of a Whiteheadian naturalism that is more or less independent of theological concerns This book offers a clear and comprehensive introduction to Whitehead's philosophy and is an essential resource for students and scholars interested in American philosophy the philosophy of mathematics and physics and issues associated with naturalism explanation and radical empiricism **Foundations of Software Science and Computational Structures** Vladimiro Sassone, 2005-03-24

This book constitutes the refereed proceedings of the 8th International Conference on Foundations of Software Science and Computation Structures FOSSACS 2005 held in Edinburgh UK in April 2005 as part of ETAPS The 30 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 108 submissions The papers are organized in topical sections on rule formats and bisimulation probabilistic models algebraic models games and automata language analysis partial order models logics coalgebraic modal logics and computational models **Concept Lattices and Their Applications** Sadok Ben Yahia, Engelbert Mephu Nguifo, Radim Belohlavek, 2008-03-13 This book constitutes the refereed proceedings of the Fourth International Conference on Concept Lattices and their Applications CLA 2006 held in Tunis Tunisia October 30 November 1 2006 The 18 revised full papers together with 3 invited contributions presented were carefully reviewed and selected from 41 submissions The topics include formal concept analysis foundations of FCA mathematical structures related to FCA relationship of FCA to other methods of data analysis visualization of data in FCA and applications of FCA **Rippling: Meta-Level Guidance for Mathematical Reasoning** Alan Bundy, 2005-06-30 Rippling is a radically new technique for the automation of mathematical reasoning It is widely applicable whenever a goal is to be proved from one or more syntactically similar givens It was originally developed for inductive proofs where the goal was the induction conclusion and the givens were the induction hypotheses It has proved to be applicable to a much wider class of tasks from summing series via analysis to general equational reasoning The application to induction has especially important practical implications in the building of dependable IT systems and provides solutions to issues such as the problem of combinatorial explosion Rippling is the first of many new search control techniques based on formula annotation some additional annotated reasoning techniques are also described here This systematic and comprehensive introduction to rippling and to the wider subject of automated inductive theorem proving will be welcomed by researchers and graduate students alike Concurrency Verification W.-P. de Roever, 2001-11-26 An advanced 2001 textbook on verification of concurrent programs using a semantic approach which highlights concepts clearly **Domains and Lambda-Calculi** Roberto M. Amadio, Pierre-Louis Curien, 1998-07-02 Graduate text on mathematical foundations of programming languages and operational and denotational semantics **Theory and Formal Methods 1993** Geoffrey Burn, Simon Gay, Mark Ryan, 2012-12-06 This volume contains the proceedings of the first workshop held by the Theory and Formal Methods Section of the Imperial College Department of Computing It contains papers from almost every member of the Section from our long term academic visitors and from those who have recently left us The papers fall into four broad areas semantics concurrency logic specification with some papers spanning a number of disciplines The subject material varies from work on mathematical foundations to practical applications of this theory expressing the Section's commitment to both the foundations of computer science and the application of theory to real computing problems In preparing the workshop and these proceedings care was taken to ensure that there were papers overviewing a field as well as ones whose primary aim was to present new scientific

results This had a dual purpose to bring our Section members up to speed in some of the areas being worked on by the Section and to provide the reader of the proceedings not only with a good introduction to many of the specific areas being investigated by the Section but also with details of some of our latest results All the papers presented at the workshop were revised following comments made by the workshop participants and all were subsequently reviewed by at least two people before producing the final versions contained in this volume
