Toeplitz and Circulant Matrices Robert M. Gray, 2006 The fundamental theorems on the asymptotic behavior of eigenvalues inverses and products of banded Toeplitz matrices and Toeplitz matrices with absolutely summable elements are derived in a tutorial manner Mathematical elegance and generality are sacrificed for conceptual simplicity and insight in the hope of making these results available to engineers lacking either the background or endurance to attack the mathematical literature on the subject By limiting the generality of the matrices considered the essential ideas and results can be conveyed in a more intuitive manner without the mathematical machinery required for the most general cases As an application the results are applied to the study of the covariance matrices and their factors of linear models of discrete time random processes The fundamental theorems on the asymptotic behavior of eigenvalues inverses and products of banded Toeplitz matrices and Toeplitz matrices with absolutely summable elements are derived in a tutorial manner Mathematical elegance and generality are sacrificed for conceptual simplicity and insight in the hope of making these results available to engineers lacking either the background or endurance to attack the mathematical literature on the subject By limiting the generality of the matrices considered the essential ideas and results can be conveyed in a more intuitive manner without the mathematical machinery required for the most general cases As an application the results are applied to the study of the covariance matrices and their factors of linear models of discrete time random processes *Toeplitz and Circulant Matrices* Robert M.
