Technologies An Associate Professor of engineering communication at Pennsylvania State University Alley is a leading researcher on the effectiveness of different designs for presentation slides *MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions* Reinout Roels, 2019-05-27 Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study observations a survey and the programmatic analysis of over 12000 PowerPoint documents The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well integrated solutions for the identified shortcomings The resulting MindXpres platform consists of a new conceptual framework content model information system and presentation engine We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof of concept plug in solutions for the identified shortcomings and unmet user needs International Handbook of the Learning Sciences Frank Fischer, Cindy E. Hmelo-Silver, Susan R. Goldman, Peter Reimann, 2018-04-19 The International Handbook of the Learning Sciences is a comprehensive collection of international perspectives on this interdisciplinary field In more than 50 chapters leading experts synthesize past current and emerging theoretical and empirical directions for learning sciences research The three sections of the handbook capture respectively foundational contributions from multiple disciplines and the ways in which the learning sciences has fashioned these into its own brand of use oriented theory design and evidence learning sciences approaches to designing researching and evaluating learning broadly construed and the methodological diversity of learning sciences research assessment and analytic approaches This pioneering collection is the definitive volume of international learning sciences scholarship and an essential text for scholars in this area The Craft of Scientific Writing Michael Alley, 2018-03-21 The Craft of Scientific Writing is designed to help scientists and engineers both professionals already active in the disciplines as well as students preparing to enter the professions write about their work clearly and effectively Written for use as a text in courses on scientific writing the book includes many useful suggestions about approaching a wide variety of writing tasks from journal papers to grant proposals and from emails to formal reports as well as a concise guide to style and usage appropriate for scientific writing Also useful for self study the book will be an important reference for all scientists and engineers who need to write about their work With this new and updated fourth edition while most technical writing texts have gotten larger over the years this one has streamlined to provide busy readers with the essence of what distinguishes the style of the best scientific documents With this new edition readers will learn not just how to organize information but how to emphasize the key details of that information Also readers will not just learn how to cast their ideas

into precise and clear sentences but how to connect these sentences in an energetic fashion In the section on language the new edition goes into much depth about how to make connections between ideas an important issue that few technical writing texts address Moreover the new edition integrates the discussion of illustrations with language because those two aspects of style are so intertwined Finally the new edition does a better job of explaining how to make the process of writing more efficient From a review of the first edition A refreshing addition to a genre dominated by English teacher style textbooks Instead of listing rules that constrain writers the book uses examples to lay out the path to successful communication Especially helpful and entertaining is the chapter on the writing process Anyone who has spent more time avoiding a writing task than actually doing it will appreciate Alley s tips Dr Ellen Ochoa Deputy Director of Flight Crew Operations Johnson Space Center
