Trigons Volume 1:

John Dee's Actions with Spirits (Volumes 1 and 2) Christopher Whitby, 2013-02-11 This was originally a two volume set which is now bound as one Here is presented an investigation of the nature of the earliest extant records of the supposed communication with angels and spirits of John Dee 1527 1608 with the assistance of his two mediums or scryers Barnabas Saul and Edward Kelly Volume 2 of this work is a transcription of the records in Dee s hand contained in Sloane MS 3188 which has been transcribed only once before by Elias Ashmole in 1672 Volume 1 is an introduction and thorough commentary to the text which is primarily explaining its many obscurities The author describes the physical state of the manuscript and its history then continues with a biography of Dee and his scryers and some background to Renaissance occult philosophy Further chapters address the arguments that the manuscript represents a conscious fraud or a cryptographical exercise and describe the magical system and instruments evolved during the communications or Actions The last fascinating chapter examines Dee s motives for believing so strongly in the truth of the Actions and suggests that a principal motive was the conviction not held by Dee alone that a new age was about to dawn upon earth

The volumes contain a taxonomic review of all named and identified taxa, their taxonomic history and current status as well as historical phylogenetic and biogeographic information. Volume 1 contains a synopsis of the fossil record and taxonomy of important groups of vertebrates represented in the fossil record of Greece. The volume deals with some of the early splitting clades including the basal and enigmatic conodonts and basal tetrapods like fishes, amphibians and reptiles like lizards, snakes, crocodiles, turtles and tortoises. The second part of the volume deals with basal mammalian clades, some of which are quite characteristic for the fossil record of the country: aardwarks, hyraxes, proboscideans, elephants and mammoths, sea cows, rodents and lagomorphs.
