The Middle School Classroom Angela Vaughn Averitt, 2008 Middle school is the Rodney Dangerfield of the education system it gets no respect We've all heard disparaging comments about it in fact we've all lived through it and most of us would probably never choose to go back to that point in time But some people actually choose to teach middle schoolers while others are assigned that level when they enter the profession Now there's a manual to help middle school teachers especially those just beginning their careers First time author Averitt writes from experience she's been an educator since 1997 here offering a step by step guide that deals with all areas of teaching from organizing the classroom to establishing order to gaining students respect Perhaps too basic for some in the profession this work could be a godsend to others Recommended for both academic and public libraries Terry Christner Library Journal

Difficult Reading Jason R. Marley, 2023-09-07 Difficult Reading offers a new approach to formal experimentation in Caribbean literature In this insightful study Jason Marley demonstrates how the aggressive antagonistic elements common to the mid twentieth century Caribbean novel foster emotional responses that spark new forms of communal resistance against colonial power Marley illustrates how experimental Caribbean writers repeatedly implicate their readers in colonial domination in ways that are intended to unsettle and discomfort In works such as Denis Williams s *The Third Temptation* Wilson Harris s *The Secret Ladder* and Vera Bell s overlooked prose poem *Ogog* acts of colonial atrocity such as the eradication of Indigenous populations in Guyana the construction of the Panama Canal or the disenfranchisement of Afro Jamaican communities become mired in aesthetic obfuscation forcing the reader to confront and rethink their own relationship to these events In this way new literary forms engender new forms of insight and outrage fostering a newly inspired relation to resistance

The break-up of Greater Britain Stuart Ward, Christian D. Pedersen, 2021-10-19 This is the first major attempt to view the break up of Britain as a global phenomenon incorporating peoples and cultures of all races and creeds that became embroiled in the liquidation of the British Empire in the decades after the Second World War A team of leading historians are assembled here to view a familiar problem through an unfamiliar lens ranging from India to China Southern Africa Australia New Zealand the Falklands Gibraltar and the United Kingdom itself At a time when trace elements of Greater Britain have resurfaced in British politics animating the febrile polemics of Brexit these essays offer a sober historical perspective More than perhaps at any other time since the empire s precipitate demise it is imperative to gain a fresh purchase on the global challenges to British identities in the twentieth century

Perspectives on Method and Theory in the Study of Religion Armin Geertz, Russel McCutcheon, 2000-04-20 This volume collects select papers on methodology in the

study of religion that were originally presented at the XVIIth Congress of the International Association for the History of Religions held in Mexico City in 1995. Granted the status of adjunct proceedings for the Congress, the collection opens with the editors' detailed survey of the longstanding importance of discussions on methodology within the IAHR. The twenty-one essays which follow examine religion and the history of the study of religion within a variety of theoretical contexts. The essays are organized in terms of three general sub-divisions: general issues in methodology; from the impact of both postmodernism and reflexive anthropology on the study of religion to the politics of religious studies as practiced in different national settings; reflections on the categories commonly employed by scholars working in the field, e.g. religion, syncretism, gender, New Religious Movements, sacred power, experience, etc. and finally, the collection ends with a review symposium on one of the more sophisticated recent treatments of the problem of defining religion: Benson Saler's *Conceptualizing Religion* (Brill, 1993). Despite carrying out their work in a variety of settings from Denmark and Finland to Britain, Switzerland, Germany, Canada, the USA, and Mexico, the authors all model a similar approach to studying religion as but one instance of human culture.

The Practice and Representation of Reading in England James Raven, Helen Small, Naomi Tadmor, 2007-09-27. Developments in cultural history and literary criticism have suggested alternative ways of addressing the interpretation of reading. How did people read in the past? Where and why did they read? How were the manner and purpose of reading envisaged and recorded by contemporaries and why? Drawing on fields as diverse as medieval pedagogy, textual bibliography, the history of science, and social and literary history, this collection of fourteen essays highlights both the singularity of personal reading experiences and the cultural conventions involved in reading and its perception. An introductory essay offers an important critical assessment of the various contributions to the development of the subject in recent times. This book constitutes a major addition to our understanding of the history of readers and reading.

The Future of the World Jenny Andersson, 2018-07-19 The Future of the World is devoted to the intriguing field of study which emerged after World War Two futurism or futurology Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world Futurists were a motley crew of Cold War warriors nuclear scientists journalists and peace activists Some argued it should be a closed sphere of science defined by delimited probabilities They were challenged by alternative notions of the future as a potentially open realm Futurism also drew on an eclectic range of repertoires some of which were deduced from positivist social science mathematics and nuclear physics and some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists
