

S2k SONIC CHLORINATOR

- Manual control applications at a down-to-earth price
- Mounts directly on a cylinder
- Capabilities to 100 pounds per day
- Easy to install, operate, and service
- Backed by factory-trained and authorized service personnel

FEATURES

A Down-To-Earth Price

Here's proof that quality doesn't have to be expensive. For low capacity chlorination, you won't find better value than the S2k. Combining the sonic-flow principle with innovative design makes the initial low cost possible—yet keeps USP/WS&T's time-proven quality and reliability.

Cylinder Mounting

The S2k Chlorinator is easy to mount directly on the valve of a chlorine cylinder. Direct mounting means all-vacuum operation. There are no lines or components carrying gas under pressure.

Manifold Mounting

The chlorinator can also be mounted on 3- or 10-cylinder manifolds.

Captive-Yoke Mounting

A unique, self-aligning captive-yoke clamp makes it easy to line up and connect the chlorinator to the gasketed outlet of a cylinder valve. The heavy-duty yoke resists damage from repeated usage and rough handling.

Easy to Install, Operate, and Maintain

The S2k Chlorinator is simple in design, having fewer than 50 parts. It's compact and easy to handle and install. Injector installation requires only connection to a

water supply and running plastic tubing to a main or open channel. A knob adjustment changes gas feedrate, which is indicated on a 3-inch-wide rotameter. The injector need not be shut off when changing cylinders. Maintenance requires only a wrench and a screwdriver.

Wide Range of Feedrates, Dual Scales Dual-scale rotameters, calibrated in pounds per day and grams per hour, cover five capacities between 5 and 100 pounds per day and 100 and 2,000 grams per hour. Single-scale rotameters, calibrated in pounds per day or kilograms per 24 hours, cover two capacities: 1.2 pounds per day and 0.5 kilograms per 24 hours. These capacities and a 20:1 operating range let the operator select any desired feedrate.

A Mini-Chlorination Center

The S2k and a USP/WS&T Two-cylinder Scale being the feedrate adjustment, feed

rate indication, and a readout of the available gas supply conveniently together.

Design and Construction

The S2k Chlorinator is all-vacuum operated. Direct-cylinder mounting puts the vacuum-regulating valve right at the gas source, immediately reducing gas pressure to a vacuum. This valve closes automatically should operating vacuum stop for any reason. When a cylinder is exhausted, a diaphragm in the valve creates a seal. This prevents the entrance of air when cylinders are changed.

The vacuum-regulating and gas-control components are in a chemical-resistant ABS housing. Besides the vacuum-regulating valve they include a porous Teflon® felt filter at the gas inlet, a pressure-relief valve that vents to a safe
