Women Priests, Symbolic Violence, and Symbolic Resistance

Sharon Jagger, 2025-02-26 This book explores from a feminist sociological viewpoint the ways gender is constructed in the priesthood in the Church of England and the political emotional and spiritual resources generated by women priests in their resistance praxis against a discriminating structure Despite the increasing numbers of women being ordained the Church continues to structurally support and legitimise the view that the priesthood should be exclusively male and women priests still experience gender discrimination and or differentiation Drawing on Bourdieu's notion of symbolic violence the book aims to fill a gap in the research literature by showing how women priests do not necessarily misrecognise or collude in their domination but engage in hidden resistances and subversions Based on empirical research the study reveals that whilst there are barriers to protesting and complaining in conventional ways there are also significant resistances in how women priests perform their role The themes addressed are relevant for sociologists of religion and scholars of gender and women's studies as well as those with an interest in theology and Christian ministry

Gender Inequality in the Ordained Ministry of the Church of England Alex D.J. Fry, 2023-09-14 This book offers a fresh social scientific analysis of how theologically conservative male clergy respond to the ordination of women to the priesthood and their consecration as bishops within the Church of England The question of women's place in the formal structures of

England's Established Church remains contested For many to prevent women from occupying such offices is often understood to be a matter of inequality whereas those who oppose their ordination see it as a matter of obedience to God's will Tensions have become heightened in a culture that increasingly promotes the rights of individuals who have historically been marginalised and that challenges traditional social roles This volume explores the gender attitudes held by clergy in the Anglo Catholic and evangelical traditions of the Church and considers how these gender attitudes shape the way they think about women's ordination and how they interact with female colleagues It also considers the contribution of a range of social phenomena to the formation of these gender attitudes The author draws on and develops a variety of sociological and psychological theories that help to explain the processes that lead to the formation of clergy attitudes towards gender more broadly
