Leashing the Dogs of War Chester A. Crocker, Fen Osler Hampson, Pamela R. Aall, 2007 The definitive volume on the sources of

contemporary conflict and the array of possible responses to it State Legitimacy and Failure in International Law Mario Silva, 2014-02-06 Failing states share characteristics of inadequate structural competency including inter alia the inability to advance human welfare and security Economic inequalities and corruption are present as well as a loss of legitimacy and reduced social cohesion Failure of rule of law is manifested in areas of judicial adjudication security reduced territorial control and systemic political instability The international community often confronts these challenges in a manner that actually complicates issues further through lack of consensus among state actors Consequently a new and emerging concept of sovereignty requires review in terms of the postmodern state Through scholarly consideration *State Legitimacy and Failure in International Law* evaluates gaps in structural competency that precipitate state failure and examines the resulting consequences for the world community The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union *The Handbook of European Defence Policies and Armed Forces* provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature *The Handbook of European Defence Policies and Armed Forces* aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to *The Handbook* collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe *Troubled Regions and Failing States* Kristian Berg Harpviken, 2010-07-07 Is the phenomenon of state failure better understood through a focus on the regional context To what extent may studies of regional security benefit from a focus on the capacities and vulnerabilities of the states involved This title addresses these questions Sovereignty, State Failure and Human Rights Neil Englehart, 2017-05-08 This book argues that the effectiveness of the state apparatus is one of the crucial variables determining human rights conditions and that state weakness and failure is responsible for much of the human rights abuses we see today Weak states are unable to control their own agents or to police abuses by private actors resulting in less accountability and more abuse

By contrast stronger states have greater capacities to protect human rights even strong authoritarian states tend to have better human rights conditions than weak ones The first two chapters of the book develop the theoretical connections between international law sovereignty states and rights and the consequences of state failure for these relationships The empirical chapters Chapters 3 6 test the validity of these theoretical claims employing a multi method approach that combines quantitative and qualitative methods Englehart uses case studies of Afghanistan Burma Myanmar and the Indian state of Bihar to analyze types and patterns of state failure based on analysis of NGO reports archival research primary and secondary texts and interviews and field research Examining what happens to human rights when states fail the book concludes with implications for scholars and activists concerned with human rights This book will be of great use to scholars of international relations comparative politics human rights law and state sovereignty

Failed States and Institutional Decay Natasha M. Ezrow, Erica Frantz, 2013-07-18 What do we mean by failed states and why is this concept important to study The failed states literature is important because it aims to understand how state institutions or lack thereof impact conflict crime coups terrorism and economic performance In spite of this objective the failed state literature has not focused enough on how institutions operate in the developing world This book unpacks the state by examining the administrative security judicial and political institutions separately By doing so the book offers a more comprehensive and clear picture of how the state functions or does not function in the developing world merging the failed state and institutionalist literatures Rather than merely describing states in crisis this book explains how and why different types of institutions deteriorate Moreover the book illustrates the impact that institutional decay has on political instability and poverty using examples not only from Africa but from all around the world

Nation Failure, Ethnic Elites, and Balance of Power Shinasi A. Rama, 2019-01-12 This book examines the history of nation building in Kosova as a model of how the theories behind nation building state building and peace building can succeed or fail The author argues that two missing factors led to successful state building but failed nation building in Kosova the balance of power and the ethnic elite The author uses his unique expert knowledge gained over thirty years of study to present a thorough overview of international administration and nation building in Kosova
