Books in the Digital Age John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution What is the role of the book in an age preoccupied with computers and the internet How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future This is the first major study of the book publishing

industry in Britain and the United States for more than two decades Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems challenges and opportunities faced by publishing firms today He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century It will be of great interest to students taking courses in the sociology of culture media and cultural studies and publishing It will also be of great value to professionals in the publishing industry educators and policy makers and to anyone interested in books and their future

Writing and Developing Your College Textbook

Mary Ellen Lepionka, 2008 This is the comprehensively revised second edition of a popular professional book on textbook writing and finding one's way in the higher education publishing world for academic authors and editors college instructors and instructional designers The second edition has two new chapters on the latest industry trends such as the pricing revolt open access movement and wiki textbook phenomenon and on the use of learning objectives to structure textbook package development Every chapter features new sections links forms models or examples from an even greater range of college courses Contains updated and expanded appendices glossary entries references bibliography entries and index BISAC Language Arts Disciplines Authorship and Publishing

E-book Platforms for Libraries Mirela Roncevic, 2013 E book vendors continue to experiment adjustments to business models consolidation of content and mergers with competitors mean constant change What's good for innovation can equal confusion when it comes to choosing an e book platform for your library Making a sound purchasing decision requires research and close consideration of trade offs and Roncevic's new issue of Library Technology Reports will get you started Based on surveys of e book vendors with an established presence in academic public and or K 12 library markets this report includes Background and business model descriptions for 51 leading e book vendors Four tables comparing content technical specifications functionality and business models An at a glance overview of platforms including vendor website URLs Bulleted checklists of factors to consider and questions to ask vendors An examination of the blurring channels of publisher aggregator and distributor platforms with advice to help you avoid content overlap
