[Anticipations](#) H. G. Wells,2013-12-06 This is the extended

annotated edition including the rare biographical essay by Edwin E Slosson called H G Wells A Major Prophet Of His Time Mr Wells s book is brilliant and interesting The author s social forecast claims to be descriptive of society as it is to be rather than of society as it ought to be and it is not therefore to be judged as an embodiment of his ideals but none the less the nature of his ideals is almost constantly in evidence and is responsible for the hard forbidding and sometimes repulsive character of the society he anticipates The only light with which his future is to be illumined is that of mechanical science Mechanical science is the fountain light of all his day the master light of all his seeing not only as regards the future but largely as regards the past The triumphs of democracy during the past two centuries he attributes to the advances in mechanics which have given a new industrial order utterly ignoring the fact that the democratic advance was led by the American colonies in which the new industrial order had no foothold save in a few cities and these cities the strongholds of the opponents of the democratic movement

neglected field Writing Place Mimesis Subjectivity and Imagination in the Works of George Gissing is the first monograph to consider the works of George Gissing 1857 1903 in light of the spatial turn By exploring how objectivity and subjectivity interact in his work the book asks what are the risks of looking for the real in Gissing s places How does the inherent heterogeneity of Gissing s observation influence the textual recapitulation of place In addition to examining canonical texts such as *The Nether World* 1889 *New Grub Street* 1891 and *The Private Papers of Henry Ryecroft* 1901 the book analyses the lesser known novels short stories journalism and personal writings of Gissing in the context of modern spatial studies The book challenges previously biographical and London centric accounts of Gissing s representation of space and place by re examining seemingly innate contemporaneous geographical demarcations such as the north and the south the city suburb and country Europe and the world and re reading Gissing s places in the contexts of industrialism ruralism the city in literature and travel writing Through sustained attention to the ambiguities and contradictions rooted in the form and content of his writing the book concludes that ultimately Gissing s novels undermine spatial dichotomies by emphasising and celebrating the incongruity of seeming certainties
