volume **Green Vegetable Oil Processing** Walter E. Farr, Andrew Proctor, 2013-12-04 Alternative green food processing technologies have gained much technical and industrial attention in recent years as a potential means of reducing costs and promoting consumer awareness of corporate environmental responsibility. However, utilizing green principles is now becoming an effective business approach to enhance vegetable oil processing profitability. Two years have passed since the first edition of *Green Vegetable Oil Processing* was published. The Revised First Edition includes much of the content of the first edition but incorporates updated data, details, images, figures, and captions. This book addresses alternative green technologies at various stages of oilseed and vegetable oil processing. This includes oil extraction technologies such as expeller, aqueous, and supercritical methods and green modifications of conventional unit operations such as degumming, refining, bleaching, hydrogenation, winterizing, dewaxing, fractionation, and deodorization. While most chapters describe soy oil processing, the techniques described are equally applicable to oils and fats in general. Documents the current state of green oil processing technologies available today. Addresses alternative green technologies at various stages of oilseed processing. Includes technologies already in commercial use and some that are still in developmental stages.
