Sustainability, Risks and Resilience of Vernacular Heritage Fernando Vegas, Camilla Mileto, Alicia Hueto Escobar, María Lidón de Miguel, 2024-06-21 This book offers a variety of analyses methodologies and reflections on the behaviour of vernacular architecture in the face of natural hazards with an emphasis on the strategies that can be used to cope with them The different examples of vernacular architecture studied in this book highlight the cultural wealth of this type of heritage which has not only adapted to locally available resources and the needs of individual populations but has also successfully responded to the natural risks it encountered As regards the types of risks analysed the chapters focus on the impact of natural events on this type of heritage proposing different methodologies for the

analysis of vulnerability and any possible damage caused. In general the contributions included offer an interesting analysis of the behaviour of vernacular architecture in the face of natural hazards and the different scales or approaches that can be employed to cope with them. This book will be of particular interest to specialists and those interested in the fields of architecture, history, structures and risk management. It was originally published as a special issue of the *International Journal of Architectural Heritage*. *From Vernacular to World Heritage* Letizia Dipasquale, Saverio Mecca, Mariana Correia, 2020. This publication brings together the results of the project 3DPAST: Living and virtual visiting European World Heritage, co-funded by the Creative Europe EU programme. The research highlighted the exceptional character and quality of living in vernacular dwellings found in World Heritage sites. This was possible by seizing the cultural space of European vernacular heritage located in Pico island, Portugal; Cuenca town, Spain; Pienza, Italy; Old Rauma, Finland; Transylvania, Romania; Berat, Gjirokastra, Albania; Patmos, Greece; and Upper Svaneti, Georgia. New digital realities grant the possibility to visit and to appreciate those places to non-travelling audiences who lack the opportunity to experience this unique heritage in situ. Creative potential is highlighted in 3D models and digital visualisations which associate outstanding local knowledge with the vernacular expression of World Heritage.

7 Fundamentals of an Operationally Excellent Management System Chitram Lutchman, Douglas Evans, Waddah Shihab Ghanem Al Hashemi, Rohanie Maharaj, 2014-12-16. Developing and maintaining a disciplined management system provides any organization with a blueprint for exceptional performance and success. Indeed, for larger multinational corporations, a management system is a critical component for sustainable growth and performance management. In this book, the authors discuss a series of fundamentals for creating an operationally excellent management system (OEMS). The book also examines the business performance impact of an OEMS across leading gas and oil organizations such as Exxon, Mobil, BP, Suncor and Chevron. In *7 Fundamentals of an Operationally Excellent Management System*, the authors discuss each fundamental in detail and provide the supporting training and workshop materials that are essential for integrating these fundamentals into the business processes of the organization. The seven fundamentals identified by the authors provide a sequential approach for developing and executing an OEMS across any organization. Integrating sound organizational and business practices with personnel and process safety management principles, the book is an invaluable resource for organizations seeking operational discipline and excellence. Well supported with graphics and practical examples, the book provides a simple pathway for an organization to evolve its management system into an OEMS designed to reduce workplace incidents and improve business performance on a sustainable basis. The management system principles discussed in the book are intended for the business leader who is motivated to transition his or her organization from ordinary through best in class to an organization of world class stature and performance.
