The Myth of Alzheimer's Peter J. Whitehouse, Daniel George, 2008-12-09 Dr Peter Whitehouse will transform the way we think about Alzheimer s disease In this provocative and ground breaking book he challenges the conventional wisdom about memory loss and cognitive impairment questions the current treatment for Alzheimer s disease and provides a new approach to understanding and rethinking everything we thought we knew about brain aging The Myth of Alzheimer s provides welcome answers to the questions that millions of people diagnosed with Alzheimer s disease and their families are eager to know Is Alzheimer s a disease What is the difference between a naturally aging brain and an Alzheimer s brain How effective are the current drugs for AD Are they worth the money we spend on them What kind of hope does science really have for the treatment of memory loss And are there alternative interventions that can keep our aging bodies and minds sharp What promise does genomic research actually hold What would a world without Alzheimer s look like and how do we as individuals and as human communities get there Backed up by research full of practical advice and information and infused with hope THE MYTH OF ALZHEIMER S will liberate us from this crippling label teach us how to best approach memory loss and explain how to stave off some of the normal effects of aging Peter J Whitehouse M D Ph D one of the best known Alzheimer s experts in the world specializes in neurology with an interest in geriatrics and cognitive science and a focus on dementia He is the founder of the University Alzheimer Center now the University Memory and Aging Center at University Hospitals Case Medical Center and Case Western Reserve University where he has held professorships in the neurology neuroscience psychiatry psychology organizational behavior bioethics cognitive science nursing and history He is also currently a practicing geriatric neurologist With his wife Catherine he founded The Intergenerational School an award winning internationally recognized public school committed to enhancing lifelong cognitive vitality Daniel George MSc is a

Beard, 2016-04-26 News of Alzheimer's disease is constantly in the headlines Every day we hear heart wrenching stories of people caring for a loved one who has become a shell of their former self of projections about rising incidence rates and of cures that are just around the corner However we don't see or hear from the people who actually have the disease In *Living with Alzheimer's* Renée L. Beard argues that the exclusively negative portrayals of Alzheimer's are grossly inaccurate To understand what life with memory loss is really like Beard draws on intensive observations of nearly 100 seniors undergoing cognitive evaluation as well as post diagnosis interviews with individuals experiencing late in life forgetfulness Since we all forget sometimes seniors with an Alzheimer's diagnosis ultimately need to be socialized into medicalized interpretations of their forgetfulness In daily life people with the disease are forced to manage stigma and the presumption of incompetence on top of the actual symptoms of their ailment The well meaning public and not their dementia becomes the major barrier to a happy life for those affected Beard also examines how

these perceptions affect treatment for Alzheimer's Interviews with clinicians and staff from the Alzheimer's Association reveal that despite the best of intentions pejorative framings of life with dementia fuel both clinical practice and advocacy efforts These professionals perpetuate narratives about self loss impending cures and the economic and emotional burden to families and society even if they do not personally believe them Yet Beard also concludes that in spite of these trends most of the diagnosed individuals in her study achieve a graceful balance between accepting the medical label and resisting the social stigma that accompanies it In stark contrast to the messages we receive this book provides an unprecedented view into the ways that people with early Alzheimer's actively and deliberately navigate their lives
