When Women Come First Gender And Class In Transnational Migration:

When Women Come First Sheba George, 2005-07-18 With a subtle yet penetrating understanding of the intricate interplay of gender race and class Sheba George examines an unusual immigration pattern to analyze what happens when women who migrate before men become the breadwinners in the family Focusing on a group of female nurses who moved from India to the United States before their husbands she shows that this story of economic mobility and professional achievement conceals underlying conditions of upheaval not only in the families and immigrant community but also in the sending community in India This richly textured and impeccably researched study deftly illustrates the complex reconfigurations of gender and class relations concealed behind a quintessential American success story *When Women Come First* explains how men who lost social status in the immigration process attempted to reclaim ground by creating new roles for themselves in their church Ironically they were stigmatized by other upper class immigrants as men who needed to play in the church because the nurses were the bosses in their homes At the same time the nurses were stigmatized as lower class sexually loose women with too much independence George s absorbing story of how these women and men negotiate this complicated network provides a groundbreaking perspective on the shifting interactions of two nations and two cultures
