Wagner Basic Architecture:

Otto Wagner August Sarnitz, Peter Gössel, 2005 Relations in Architecture August Sarnitz, 2020-05-05 The title of the book sets the two fields of activity pursued by the architect architectural historian and theorist August Sarnitz building and writing in a reciprocal relation the context to what has been built emerges in the process of writing just as the context to what has been written emerges in the process of building The structure of the book follows precisely this reciprocity an essay about architectural history and Big Data is followed by three on the topics of urban development social housing and the fiction of space A number of influential Viennese architects appear as well Frank Kiesler Hollein and Prix The topics of housing design and furniture are all illustrated with Sarnitz's own projects the end of the book is dedicated to architectural photography which is especially important to Sarnitz in his capacity as publicist The richly illustrated book is the first to document Sarnitz's work as author designer exhibition designer architect and photographer **Otto Wagner** Harry Mallgrave, 1996-07-11 These essays explore the parameters of Wagner's rich literary and architectural creations **Modern Architecture** Graham Livesey, 2024-11-15 Modern Architecture The Basics examines technological stylistic socio political and cultural changes that have transformed the history of architecture since the late 18th century Broad definitions of modernity and postmodernity introduce the book which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture These include major historical movements key figures and evolving building typologies There is also an emphasis on the changing city during the 19th and 20th centuries Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression The book introduces new topics including gender race postcolonialism and indigeneity An undaunting contemporary and inclusive account of modern architectural history this is a must read for all students of architecture as well as those outside the discipline approaching the subject for the first time Modern Architecture Otto Wagner, 1988 In 1896 Otto Wagner's Modern Architecture shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity Modern Architecture is one of those rare

works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century **Nietzsche and Architecture** Lucy Huskinson,2024-07-25 Nietzsche and Architecture explores Nietzsche s relationship to the architects buildings and modern architectural movements he went on to inspire and situates his philosophy more appropriately and comprehensively within the field of architectural studies architectural history and theory Divided into two parts the book first examines Nietzsche s philosophy of architecture exploring his notions of rhythm ornament style and power It then goes on to examine Nietzsche s ambiguous architectural legacy scrutinising iconic architects thinkers designs and cultural movements to ascertain their relationship with Nietzschean ideas from the crystal architecture of Bruno Taut and Peter Behrens to the new styles of the Bauhaus and Le Corbusier Louis H Sullivan s desire for the heights and the cultural propaganda of Nazi architecture Clearly explaining the subtleties and complexities of Nietzsche s architectural thought Nietzsche and Architecture provides an accessible insight into Nietzsche s philosophy and its significance to the development of modern architecture in the 19th and early 20th centuries shedding vital light on the continued relevance of Nietzsche to architecture today **The Architecture of Red Vienna, 1919-1934** Eve Blau,1999 Encyclopedic in its coverage this seminal work focuses on the architecture of Prague from the turn of the century to the end of the Second World War a rich matrix within which to place the figures who created the powerful innovative spirits of modern Czech architecture The book documents the architects structures and theoretical underpinnings that helped to shape Prague s cultural heritage and present day artistic spirit *Architecture* ,1925 **Architecture Re-assembled** Trevor Garnham,2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making 100 Gennaro Postiglione,2004 This volume features 100 homes of different architects *Architectures of Poetry* ,2021-09-06 Architectures of Poetry is the first comprehensive accounting of the currently intense dialogue between the sister arts of poetry and architecture Refusing to take either term in a metaphoric sense the eleven essays collected in this volume exemplify an exciting methodological direction for work in the humanities a

literal wager that is willing to take the unintended suggestions of language as reality At the same time they also provide close readings of the work of a number of important writers In addition to a suite of essays devoted to the team of Arakawa and Madeline Gins chapters focus on figures as diverse as Francesco Borromini Rainer Maria Rilke St phane Mallarm Friedrich Achleitner John Cage and Lyn Hejinian Mysticism and Architecture Roger Paden,2007-01-01 A multi disciplinary study of the house that the philosopher Ludwig Wittgenstein built for his sister in Vienna between 1926 and 1928 this book weaves together ideas taken from a number of disciplines sociology political science aesthetics architecture urban planning and philosophy to develop a complex multifaceted interpretation of the purpose and design of the house which in turn is used to ground a new interpretation of Wittgenstein s philosophical works emphasizing their mystical nature and practical purpose

The Architecture of Phantasmagoria Libero Andreotti,Nadir Lahiji,2016-11-10 In a time of mass mediated modernity the city becomes almost by definition a constitutively mediated city Today more than ever before the omnipresence of media in every sphere of culture is creating a new urban ontology saturating fracturing and exacerbating the manifold experience of city life The authors describe this condition as one of hyper mediation a qualitatively new phase in the city s historical evolution The concept of phantasmagoria has pride of place in their study using it as an all embracing explanatory framework they explore its meanings as a critical category to understand the culture and the architecture of the contemporary city Andreotti and Lahiji argue that any account of architecture that does not include understanding the role and function of media and its impact on the city in the present tele technological capitalist society is fundamentally flawed and incomplete Their approach moves from Walter Benjamin through the concepts of phantasmagoria and of media as theorized also by Theodor Adorno Siegfried Kracauer and a new generation of contemporary critics towards a new socio critical and aesthetic analysis of the mediated space of the contemporary city **Architect's Drawings A Selection of Sketches by World**

Famous Architects through History ,2025-08-31 Architect s Drawings A Selection of Sketches by Architects Through History is a fascinating journey into the role of sketches in the design process From the Renaissance to contemporary practice this book explores how architects have used drawings not just as technical tools but as instruments of imagination inspiration and communication **Architectural Record** ,1925 **The Ethical Function of Architecture** Karsten

Harries,1998-07-31 Can architecture help us find our place and way in today s complex world Can it return individuals to a whole to a world to a community Developing Giedion s claim that contemporary architecture s main task is to interpret a way of life valid for our time philosopher Karsten Harries answers that architecture should serve a common ethos But if architecture is to meet that task it first has to free itself from the dominant formalist approach and get beyond the notion that its purpose is to produce endless variations of the decorated shed In a series of cogent and balanced arguments Harries questions the premises on which architects and theorists have long relied premises which have contributed to architecture s current identity crisis and marginalization He first criticizes the aesthetic approach focusing on the problems of decoration

and ornament He then turns to the language of architecture If the main task of architecture is indeed interpretation in just what sense can it be said to speak and what should it be speaking about Expanding upon suggestions made by Martin Heidegger Harries also considers the relationship of building to the idea and meaning of dwelling Architecture Harries observes has a responsibility to community but its ethical function is inevitably also political He concludes by examining these seemingly paradoxical functions

Rudolph M. Schindler's Unbuilt Architecture Jin-Ho Park,2025-11-17 This book explores Rudolph M Schindler s design theory architectural languages and methods with a focus on his unbuilt projects Drawing from his lecture notes manuscripts and drawings it offers fresh insights into Schindler s legacy emphasizing how his work diverged from mainstream modernism and deserves greater recognition in modern architectural history Part I investigates Schindler s theoretical and methodical foundations including his concept of space architecture and Reference Frames in Space three dimensional tools for shaping form and proportion Using archival materials it traces the development and evolution of his ideas within broader historical and theoretical contexts Part II presents detailed analyses of over a dozen unbuilt projects reconstructed through drawings and models These case studies reveal Schindler s design theory and methods in practice and provide a deeper understanding of his creative process and influence on modern architecture This book will appeal to architectural scholars students and practitioners interested in early modernism and Californian Modernism It also speaks to institutions libraries and enthusiasts of Rudolph M Schindler s work With global interest in Schindler s legacy the book offers valuable insights for both academic and general audiences passionate about his unique architectural vision

Introducing Architectural Tectonics Chad Schwartz,2016-10-04 Introducing Architectural Tectonics is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in eleven countries including Germany Italy United States Chile Japan Bangladesh Spain and Australia and designed by such notable architects as Tadao Ando Herzog de Meuron Kengo Kuma Olson Kundig and Peter Zumthor Although similarities do exist between the projects their distinctly different characteristics location and climate context size program construction methods and range of interpretations of tectonic expression provide the most significant lessons of the book helping you to understand tectonic theory Written in clear accessible language these investigations examine the poetic creation of architecture showing you lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office

When Modern Was Green David Haney,2010 Today contemporary landscape design is increasingly drawing from ideas of sustainability and ecological stability Not in fact new the foundations of this approach stem from early twentieth century Germany where architects and

planners were already beginning to use the design concepts which are now referred to as green This ecological school of thought was driven by modernist landscape architect Leberecht Migge 1881 1935 Working with significant modernist architects of the age including Martin Elsaesser Ernst May Bruno Taut and Martin Wagner Migge was responsible for some of the most important housing and planning projects of the age the mass housing settlements or Gro siedlungen of Frankfurt Main and Berlin Using biotechnic principles to integrally link dwelling and garden Migge was able to recycle household waste to grow foodstuffs through the use of innovative infrastructure and open space planning Also a skilled park and garden designer he drew together green and architectural elements in his garden architectonic approach David H Haney s book is the first to fully document Leberecht Migge s life and work Using Migge as a starting point Haney addresses conceptual and theoretical aspects of German ecological design challenging conventional assumptions about modernism and ecological design history With 200 illustrations and photographs When Modern Was Green is ideal for students and academics interested in modernism landscape history and higher level German studies

Key Modern Architects Andrew Higgott, 2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect s work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect s working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect s most significant projects along with suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a critical approach Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history
