**On the Evolution of Conscious Sensation, Conscious Imagination, and Consciousness of Self** Robert G. Kunzendorf, 2016-12-05 Philosophical thought experiments invoking inverted spectra zombies et cetera suggest that conscious sensations have no function and psychological studies finding no correlation between vivid visual imaging and visual problem solving suggest that conscious images have no function Furthermore both philosophical and psychological theories suggest that self-consciousness has no function Countering such suggestions the post-Darwinian double aspect theory which Professor Robert Kunzendorf introduces in the first chapter of his monograph *On the Evolution of Conscious Sensation Conscious Imagination and Consciousness of Self* points to evolutionary functions of certain sensations youngling vivid images and self-consciousness Kunzendorf's second chapter presents evidence that the most primitive sensation pain the subjective aspect of free nerve endings or nociceptors has a survival promoting function But as the pressure nociceptor mutates into a touch receptor the heat nociceptor into temperature receptor and the chemical nociceptor into a taste receptor the painful qualia of these nociceptors evolve respectively into touch sensation temperature sensation or taste sensation painless sensations that add no survival benefit to their receptor's physical aspect Building on evidence that retinal receptors embodying visual qualia evolved from primitive eyespots responsive to injurious heat at a distance or painful light the third chapter presents evidence that visually imagined sensations are the subjective qualities of retinal receptors that are corticofugally innervated in warm blooded animals for the developmental purpose of testing cortically hypothesized sensory motor rules that have greater survival value than cold blooded stimulus response associations The fourth and final chapter focuses on self-conscious reality testing and on visuo-spatial self-conceptualization and presents evidence that such manifestations of self-awareness evolve only in those warm blooded animals whose rule-developing youth lasts two years or longer that is those mammals and birds whose survival during the imaginal testing of rules is subjected to prolonged risk if self-consciousness that one is imaging sensations rather than perceiving sensations is absent      *Sisters of Fortune* Jehanne Wake, 2012-02-28 The first American heiresses took Britain by storm in 1816 two generations before the great late Victorian

The new army list, by H.G. Hart [afterw.] Hart's army list. [Quarterly] Henry George Hart, 1882 The Life and Death of Ryan White Paul M. Renfro, 2024-10-22 In the 1980s as HIV AIDS ravaged queer communities and communities of color in the United States and beyond a straight white teenager named Ryan White emerged as the face of the epidemic Diagnosed with hemophilia at birth Ryan contracted HIV through contaminated blood products In 1985 he became a household name after he was barred from attending his Indiana middle school As Ryan appeared on nightly news broadcasts and graced the covers of popular magazines he was embraced by music icons and well known athletes achieving a curious kind of stardom Analyzing his struggle and celebrity Paul M Renfro's powerful biography grapples with the contested meanings of Ryan's life death and afterlives As Renfro argues Ryan's fight to attend school forced the American public to reckon with prevailing misconceptions about the AIDS epidemic Yet his story also reinforced the hierarchies at the heart of the AIDS crisis Because the innocent Ryan had contracted HIV through no fault of his own as

many put it his story was sometimes used to blame presumably guilty populations for spreading the virus Reexamining Ryan s story through this lens Renfro reveals how the consequences of this stigma continue to pervade policy and cultural understandings of HIV AIDS today **Congressional Record** United States.
