Walking On Water Reading Writing And Revolution:

Walking on Water Derrick Jensen, 2005 This is a hard hitting and sometimes scathing critique of the current educational system that not only gives a hands on method for learning how to write but also a lesson on how to connect to the core of our creative selves **Awaken 101** Christopher Uhl, Melissa DiJulio, 2020-09-15 Discovering our meaning and purpose our reason for being can seem like an impossible task especially given the tumultuous times in which we find ourselves Through challenging provocations uplifting narratives and profound insights this book emboldens readers to experience their lives not as spectators but as reflective courageous and purposeful participants We can turn toward the problems look them in the eye and begin the work of setting things right we can begin the process of awakening Organized as a five part journey it explores both cognitively and experientially what it might mean to assume the rightful authorship of your life By breaking out of the dominant narrative of how life should be lived and by becoming more aware of the world around us we can gain the tools essential for becoming open minded embodied introspective and soulful human beings

The Ethics of Homelessness: Philosophical Perspectives , 2020-01-20 This new and expanded edition of G John M Abbarno s anthology The Ethics of Homelessness underscores what is ignored in plain sight people without a home or dwelling are also without privacy and dignity It is argued that they lack moral standing The chapters uncover the harsh realities of poverty where economic value overrides competing human values Naomi Zack argues that homelessness is symbolic of society s materialistic values It has a tendency to resist sufficient charity and perpetuates conditions of injustice Uma Narayan questions whether the homeless have protection under the U S Constitution Other authors present an enlarged sphere of homeless to include runaway children refugees adoptees and the disabled The book demonstrates the value of applied philosophy *The Demise of the Library School* Richard J. Cox, 2010 In The Demise of the Library School Richard J Cox places the present and future of professional education for librarianship in the debate on the modern corporate university The book is a series of meditations on critical themes relating to the education of librarians archivists and other information professionals playing off of other commentators analyzing the nature of higher education and its problems and promises **Revolutions in Learning and Education from India** Christoph Neusiedl, 2021-02-15 This book offers an important critique of the ways in which mainstream education contributes to perpetuate an inherently unjust and exploitative Development model Instead the book proposes a new anarchistic postdevelopmental framework that goes beyond Development and schooling to ask what really makes a meaningful life Challenging the notion of Development as a win win relationship between civil society the state and the private sector the book argues that Development perpetuates a hierarchical world order and that the education system serves to reinforce and re legitimise this unequal order Drawing on real life examples of unschooling and self designed learning in India the book demonstrates that more autonomous approaches such as these can help to fundamentally challenge dominant ideas of education equality development and what it

means to lead meaningful lives The interdisciplinary approach pursued in this book makes it perfect for anyone with interests across the areas of education development studies radical political theory and philosophy **Higher Education**

Towards Critical Environmental Education

Aristotelis S. Gkiolmas,Constantine D. Skordoulis,2020-11-03 This volume discusses theory philosophy praxis and methods in Environmental and Ecological education and considers the junction with the main visions and issues of Critical Pedagogy The

volume and its separate chapters address four axes which can also be seen as the guidelines of the content as well as the central objectives of the book. The first axis concerns the missing theoretical and practical pieces at this point in time. The volume considers the issues that are not included in contemporary Environmental Education and thus deprive it from critical orientations. This implies that in Environmental Education very little discussion exists about the political, economic, racial, gender, and class issues that in most cases govern the actions of leaders and stakeholders. The second axis concerns what has been done so far and in what directions. This involves descriptions of theoretical approaches or actual applied methodologies in the classroom such as curricula or syllabus used or the kind of actions certain educators have taken to infuse the issues of justice and critical reflection within the Environmental Education teaching agenda. The third axis examines proposals. It looks at ways to enrich domains of Environmental Education with the argumentations of Critical Pedagogy. The fourth axis concerns the way in which proposals can be effectuated. This part contains specific methodologies and teaching sequences depicting ways of including major aspects of Critical Pedagogy and Critical Education in Environmental Education. Examples are Non anthropocentric ecological approaches in the classroom, political activism in the Curricula, mixture of field activities and political activities.

A Hunter-Gatherer's Guide to the 21st Century Heather Heying, Bret Weinstein, 2021-09-14. A provocative exploration of the tension between our evolutionary history and our modern woes and what we can do about it. We are living through the most prosperous age in all of human history yet we are listless, divided, and miserable. Wealth and comfort are unparalleled but our political landscape is unmoored and rates of suicide, loneliness, and chronic illness continue to skyrocket. How do we explain the gap between these truths? And how should we respond? For evolutionary biologists Heather Heying and Bret Weinstein, the cause of our troubles is clear: the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt. We evolved to live in clans but today many people don't even know their neighbors' names. In our haste to discard outdated gender roles, we increasingly deny the flesh and blood realities of sex and its ancient roots. The cognitive dissonance spawned by trying to live in a society we are not built for is killing us. In this book, Heying and Weinstein draw on decades of their work teaching in college.

Dreams Derrick Jensen, 2011-01-04 Jensen's furthest reaching book yet Dreams challenges the destructive nihilism of writers like Richard Dawkins and Sam Harris who believe that there is no reality outside what can be measured using the

tools of science He introduces the mythologies of ancient cultures and modern indigenous peoples as evidence of alternative ways of understanding reality informed by thinkers such as American Indian writer Jack Forbes theologian and American Indian rights activist Vine Deloria Shaman Martin Prechtel Dakota activist and scholar Waziyatawin and Okanagan Indian writer Jeannette Armstrong He draws on the wisdom of Dr Paul Stamets author of Mycelium Running How Mushrooms Can Help Save the World sociologist Stanley Aronowitz who discusses science's lack of accountability to the earth and many more As in his other books Jensen draws heavily from his own life experience living alongside the frogs redwoods snails birds and bears of the upper northwest about which he writes with exquisite tenderness Having taken on the daunting task of understanding one's dreams as a source of knowledge Jensen achieves the near impossible in this breathtakingly brave and ambitious new work

Unflattening Nick Sousanis, 2015-04-20 The primacy of words over images has deep roots in Western culture But what if the two are inextricably linked equal partners in meaning making Written and drawn entirely as comics Unflattening is an experiment in visual thinking Nick Sousanis defies conventional forms of scholarly discourse to offer readers both a stunning work of graphic art and a serious inquiry into the ways humans construct knowledge Unflattening is an insurrection against the fixed viewpoint Weaving together diverse ways of seeing drawn from science philosophy art literature and mythology it uses the collage like capacity of comics to show that perception is always an active process of incorporating and reevaluating different vantage points While its vibrant constantly morphing images occasionally serve as illustrations of text they more often connect in nonlinear fashion to other visual references throughout the book They become allusions allegories and motifs pitting realism against abstraction and making us aware that more meets the eye than is presented on the page In its graphic innovations and restless shape shifting Unflattening is meant to counteract the type of narrow rigid thinking that Sousanis calls flatness Just as the two dimensional inhabitants of Edwin A Abbott's novella Flatland could not fathom the concept of upwards Sousanis says we are often unable to see past the boundaries of our current frame of mind Fusing words and images to produce new forms of knowledge Unflattening teaches us how to access modes of understanding beyond what we normally apprehend
