evolving perceptions of the clinical efficacy of Chinese medicine The individual essays cohere around the powerful theoretical methodological approach historical epistemology which challenges the seemingly constant and timeless status of such rudimentary but pivotal dimensions of scientific process as knowledge reason argument objectivity evidence fact and truth In studying the globalising role of medical objects the contested premise of medical authority and legitimacy and the syncretic transformations of metaphysical and ontological knowledge contributors illuminate how the breadth of the historical study of Chinese medicine and its practices of knowledge making in the modern period must be at once philosophical and transnational in scope
