Lewis, 2020-02-01 Walter Benjamin's Antifascist Education is the first comprehensive analysis of educational themes across the entirety of the critical theorist's diverse writings Starting with Benjamin's early reflections on teaching and learning Tyson E Lewis argues that the aesthetic and cultural forms to which Benjamin so often turned namely radio broadcasts children's theatrical productions collections cityscapes public cinemas and word games swell with educational potentialities What emerges from Lewis's reading is a constellational curriculum composed of minor practices such as poor teaching absentminded learning and nondurational studying This curriculum carries political significance offering an antidote to past and present forms of fascist manipulation hardness and coldness Walter Benjamin's Antifascist Education is a testimony to Benjamin's belief that everyone is an educator and everyone needs to be educated and everything is education *Citation and Precedent* Thomas Oliver Beebe, 2014-03-27 Among Western literatures only the German speaking countries can boast a list of world class writers such as Goethe Hoffmann Kleist Kafka Schmitt and Schlink who were trained as legal scholars Yet this list only hints at the complex interactions between German law and literature It can be supplemented for example with the unique interventions of the legal system into literature ranging from attempts to save literature from the tidal wave of Schund pulp fiction in the early twentieth century to audiences suing theaters over the improper production of classics in the twenty first The long list of instances where German literature cites law or where German law serves literature as a precedent signal the dream of German culture of a unity of interests and objectives between spheres of activity Yet the very vitality of this dream stems from real historical and social processes that increasingly autonomize and separate these domains from each other Beebe examines the history of this dialectical tension through close readings of numerous cases in the modern era ranging from

The Dialectic of Herbert Marcuse Patrick Gamsby,2024-09-05 Herbert Marcuse 1898 1979 was one of the most recognizable and controversial public intellectuals throughout the 1960s until his death in the late 1970s but today Marcuse s work largely stands in the shadows of other Frankfurt School members and critical thinkers Despite having once held a prominent and influential position amongst scholars activists and readers in the twentieth century it is argued that Marcuse s work nevertheless remains largely misunderstood The Dialectic of Herbert Marcuse offers a new interpretation of Marcuse one that attempts to show how Marcuse s work has so often been turned into something else into its opposite In shining a light on parts of the unknown Marcuse through the use of archival material and published works this book reveals Marcuse s Critical Theory to be one of hope not one of pessimism as it is so often portrayed to be Ultimately it is argued that Marcuse s Critical Theory remains a vital and important body of work for present day society and ought to be revisited Critical

Theory from the Margins Saladdin Ahmed,2023-09-01 Great critical theorists from Marx and Engels to Adorno and Horkheimer not only came from the margins but also stayed faithful to the plight of the marginalized They refused to compromise about the struggle for equality and tried to universalize its emancipatory essence From Marx to Benjamin critical philosophers who showed fidelity to the cause were denied a career in European universities and made impoverished stateless and homeless Marginalization and critical theory are inseparable yet today Marxism is institutionalized and the Frankfurt School s Critical Theory is gentrified Critical Theory from the Margins however revives the Critical Theory that

endorses criticism aiming to negate dominant regimes of truth It is unapologetic in its fidelity to the universalist struggles of the minoritized In that spirit Saladdin Ahmed shows that capitalism imposes a totalitarian social mode of existence and neoliberalism perpetuates fascism as a class of ideology across nationalist and religious movements This book then is both a theorization and an argument in favor of the application of the episteme of the silenced as the essence of the critical education necessary for achieving universal emancipation

The Negritude Movement Reiland Rabaka, 2015-05-20 The Negritude Movement provides readers with not only an intellectual history of the Negritude Movement but also its prehistory W E B Du Bois the New Negro Movement and the Harlem Renaissance and its posthistory Frantz Fanon and the evolution of Fanonism By viewing Negritude as an insurgent idea to invoke this book's intentionally incendiary subtitle as opposed to merely a form of poetics and aesthetics The Negritude Movement explores Negritude as a traveling theory la Edward Said's concept that consistently crisscrossed the Atlantic Ocean in the twentieth century from Harlem to Haiti Haiti to Paris Paris to Martinique Martinique to Senegal and on and on ad infinitum The Negritude Movement maps the movements of proto Negritude concepts from Du Bois's discourse in *The Souls of Black Folk* through to post Negritude concepts in Fanon's *Black Skin White Masks* and *The Wretched of the Earth* Utilizing Negritude as a conceptual framework to on the one hand explore the Africana intellectual tradition in the twentieth century and on the other hand demonstrate discursive continuity between Du Bois and Fanon as well as the Harlem Renaissance and Negritude Movement The Negritude Movement ultimately accents what Negritude contributed to arguably its greatest intellectual heir Frantz Fanon and the development of his distinct critical theory Fanonism Rabaka argues that if Fanon and Fanonism remain relevant in the twenty first century then to a certain extent Negritude remains relevant in the twenty first century

Diagrams of Power in Benjamin and Foucault Mark Laurence Jackson, 2022-09-04 This book's overarching premise is that discussion and critique in the discourses of architecture and urbanism have their primary focus on engagements with form particularly in the sense of the question as to what planning and architecture signify with respect to the forms they take and how their meanings or content what is contained is considered in relation to form as container While significant critical work in these disciplines has been published over the past 20 years that engages pertinently with the writings of Walter Benjamin and Michel Foucault there has been no address to the co incidence in the work of Benjamin and Foucault of an architectural figure that is pivotal to each of their discussions of the emergence of modernity The arcade for Benjamin and the panoptic prison for Foucault have a parallel role In Foucault's terms panopticism is a diagram of power The parallel for Benjamin would be his understanding of constellation In more recent architectural writings the notion of the diagram has emerged as a key motif Yet and in as much as it supposedly relates to aspects of the work of Foucault along with Gilles Deleuze this notion of diagram amounts for the most part to a thinly veiled reinstatement of geometry as idea This book redresses the emphasis given to form within the cultural philosophy of modernity and particularly with respect to architecture and urbanism inflects on the agency of force that opens

a reading of their productive capacities as technologies of power It is relevant to students and scholars in poststructuralist critical theory architecture and urban studies This is a book about Foucault and Benjamin and it is grounded in a deep knowledge of and reflection upon their works but it is also underpinned by an impressive erudition There are reflections on Hegel and Heidegger central to the author and Derrida along with Kierkegaard and others This leads to a rich and suggestive discussion in staging a spatial architectural political conversation between Foucault and Benjamin Anonymous Reviewer

Mark Jackson's *Diagrams of Power in Benjamin and Foucault: The Recluse of Architecture* juxtaposes and interrogates its two leading actors so as to draw from and through them a theory of architecture which is inseparable from its recluse In doing so it elaborates a series of complex connections with their various interlocutors and inspirations Hegel Heidegger Derrida the Kabbalah Agamben allegory Marx Deleuze Klossowski tragedy capitalism modernity and so on The list is long and impressive This is not only done with an extremely high degree of scholarship but is presented in a light lucid and very compelling manner in a voice both personal and authoritative The recluse is the figure of mimesis itself the appearance of a withdrawal always already a ruin This book not only contributes a highly astute reading of its philosophical objects but it enacts the ontology of the recluse through its own unfolding simultaneously revealing and withholding the meaning of architecture as such so that we not only understand its meaning but feel the pulsing differential of the book's object as if it were alive within us Stephen Zepke Independent Researcher Vienna

Speaking of Evil Matthew Boedy, 2018-10-15 Rhetoric and the Responsibility to and for Language *Speaking of Evil* relocates the problem of evil the question of why God would allow for the existence of evil and surveys it as a rhetorical problem It raises this question if we speak evil how shall we speak of evil When we communicate we are naming and evil as the corruption of language plays a central role in that naming Evil freezes our words convinces us we have the sole right to their definitions and generally stifles the dynamic gift of language By looking at how people in different eras and situations have named evil this book suggests how we can better take responsibility for our words and why we owe a responsibility to language as our ethical stance toward evil Gordon Matta-Clark? Conical Intersect Peter Muir, 2017-07-05 In this in depth analysis Peter Muir argues that Gordon Matta Clark's *Conical Intersect* 1975 is emblematic of Henri Lefebvre's understanding of art's function in relation to urban space By engaging with Lefebvre's theory in conjunction with the perspectives of other writers such as Michel de Certeau Jacques Derrida and George Bataille the book elicits a story that presents the artwork's significance origins and legacies *Conical Intersect* is a multi media artwork which involves the intersections of architecture sculpture film and photography as well as being a three dimensional model that reflects aspects of urban art and architectural theory along with a number of cultural and historiographic discourses which are still present and active This book navigates these many complex narratives by using the central hole of *Conical Intersect* as its focal point this apparently vacuous circle around which the events documents and other historical or theoretical references surrounding Matta Clark's project are perpetually in circulation Thus *Conical Intersect* is imagined as

an insatiable absence around which discourses continually form dissipate and resolve Muir argues that Conical Intersect is much more than an artistic hole Due to its location at Plateau Beaubourg in Paris it is simultaneously an object of art and an instrument of social critique

Contemporary Art About Architecture Nora Wendl, 2017-07-05 An important resource for scholars of contemporary art and architecture this volume considers contemporary art that takes architecture as its subject Concentrated on works made since 1990 *Contemporary Art About Architecture A Strange Utility* is the first to take up this topic in a sustained and explicit manner and the first to advance the idea that contemporary art functions as a form of architectural history theory and analysis Over the course of fourteen essays by both emerging and established scholars this volume examines a diverse group of artists in conjunction with the vernacular canonical and fantastical structures engaged by their work I Mangano Ovalle Matthew Barney Monika Sosnowska Pipa Nguyen duy and Paul Pfeiffer are among those considered as are the compelling questions of architecture's relationship to photography the evolving legacy of Mies van der Rohe the notion of an architectural unconscious and the provocative concepts of the unbuilt and the unbuildable Through a rigorous investigation of these issues *Contemporary Art About Architecture* calls attention to the fact that art is now a vital form of architectural discourse Indeed this phenomenon is both pervasive and in its individual incarnations compelling a reason to think again about the entangled histories of architecture and art

Solidarity in a Secular Age Charles H. T. Lesch, 2022 In an age of declining religiosity and rising nationalism how can we form strong social bonds without racism demagoguery and xenophobia In *Solidarity in a Secular Age* Charles H T Lesch responds to this question by narrating an untold story of European political theology and spotlighting a neglected strand of modern Jewish philosophy to propose a new theory of liberal democratic solidarity Radically revising political theory's relationship to religion he challenges us to rethink and rebuild our social bond
