Women Fire And Dangerous Things:

Women, Fire, and Dangerous Things George Lakoff, 2008-08-08 Its publication should be a major event for cognitive linguistics and should pose a major challenge for cognitive science In addition it should have repercussions in a variety of disciplines ranging from anthropology and psychology to epistemology and the philosophy of science Lakoff asks What do categories of language and thought reveal about the human mind Offering both general theory and minute details Lakoff shows that categories reveal a great deal David E Leary American Scientist Contemplating Minds William J. Clancey, Stephen W. Smoliar, Mark Stefik, 1994 One place where the scientific debate has been written for a broad audience is in the book review column of the international journal Artificial Intelligence which has evolved from simple reviews to a multidisciplinary forum where reviewers and authors debate the latest often competing theories of human and artificial intelligence **Vanishing Voices** Daniel Nettle, Suzanne Romaine, 2000-07-27 Few people know that nearly one hundred native languages once spoken in what is now California are near extinction or that most of Australia's 250 aboriginal languages have vanished In fact at least half of the world's languages may die out in the next century Daniel Nettle and Suzanne Romaine assert that this trend is far more than simply disturbing Making explicit the link between language survival and environmental issues they argue that the extinction of languages is part of the larger picture of near total collapse of the worldwide ecosystem Indeed the authors contend that the struggle to preserve precious environmental resources such as the rainforest cannot be separated from the struggle to maintain diverse cultures and that the causes of language death like that of ecological destruction lie at the intersection of ecology and politics In addition to defending the world's endangered languages the authors also pay homage to the last speakers of dying tongues such as Red Thundercloud a Native American in South Carolina Ned Mandrell with whom the Manx language passed away in 1974 and Arthur Bennett an Australian who was the last person to know more than a few words of Mbabaram In our languages lies the accumulated knowledge of humanity Indeed each language is a unique window on experience Vanishing Voices is a call to preserve this resource before it is too late Moral Imagination Mark Johnson, 1993 The Enlightenment idea that reason creates fixed moral rules that specify the right thing to do is mistaken according to Johnson because it misses the ways in which human conceptual systems are grounded in bodily experience and it ignores the expansive and constructive nature of our best moral thinking Since new findings in cognitive science explain reasoning in terms of prototypes frame semantics metaphor and basic level experience Johnson contends that we must revise our views of ethics and adopt an alternative conception of moral reflection one that is thoroughly imaginative **Seeing and Showing the Unseen** Adam Szumorek, 2023-10-31 As humans we think in images and cannot do otherwise Thus metaphor and imagery often viewed as complex literary devices are in fact the very building blocks of human thought and essential components for understanding the nature of God Exploring how the God of Scripture reveals himself through metaphor and imagery Dr Adam Szumorek utilizes Cognitive Linguistics to help students teachers

and preachers understand how meaning is communicated in Scripture and conceptualized within the human brain He provides a theological framework for applying Cognitive Linguistics in biblical exegesis demonstrating its value in aiding our understanding of biblical texts and in communicating that understanding to others through sermons that speak to people's minds hearts and imaginations Both richly conceptual and deeply practical this book equips readers to communicate the unseen allowing others to taste touch and see the invisible yet incarnate God

The Power of Tantra Hugh B. Urban, 2009-10-30 In the West the varied body of texts and traditions known as Tantra for more than two centuries has had the capacity to scandalize and shock For European colonizers Orientalist scholars and Christian missionaries of the Victorian era Tantra was generally seen as the most degenerate and depraved example of the worst tendencies of the so called Indian mind a pathological mixture of sensuality and religion that prompted the decline of modern Hinduism Yet for most contemporary New Age and popular writers Tantra is celebrated as a much needed affirmation of physical pleasure and sex indeed as a cult of ecstasy to counter the perceived hypocritical prudery of many Westerners In recent years Tantra has become the focus of a still larger cultural and political debate In the eyes of many Hindus much of the western literature on Tantra represents a form of neo colonialism which continues to portray India as an exotic erotic hyper sexualized Orient Which then is the real Tantra Focusing on one of the oldest and most important Tantric traditions based in Assam northeast India Hugh B Urban shows that Tantra is less about optimal sexual pleasure than about harnessing the divine power of the goddess that flows alike through the cosmos the human body and political society In a fresh and vital contribution to the field the author suggests that the real meaning of Tantra lies in helping us rethink not just the history of Indian religions but also our own modern obsessions with power sex and the invidious legacies of cultural imperialism
