Women Justice Tanzania Eastern Africa:

Women, Land and Justice in Tanzania Helen Dancer, 2015 Recent decades have seen a wave of land law reforms across Africa in the context of a land rush and land grabbing But how has this been enacted on the ground and in particular how have women experienced this This book seeks to re orientate current debates on women s land rights towards a focus on the law in action Centring on cases involving women litigants the book considers the extent to which women are realising their interests in land through land courts and follows the progression of women s claims to land from their social origins through processes of dispute resolution to judgment Unedited summary from book cover

Gender and the Global Land Grab Andrea M. Collins, 2024-06-15 Since the year 2000 millions of hectares of land in the Global South have been acquired by foreign investors for large scale agricultural projects displacing and disrupting rural communities Women are especially disadvantaged by the global land grab they are less likely to inherit control or make decisions over land but often need land to support themselves their families and their communities While international organizations have developed global guidelines to improve land governance tensions still run high as the current policies fall short Gender and the Global Land Grab introduces a feminist conceptual framework to analyze land governance policy around the world Andrea Collins shows how gender norms biases and expectations shape land politics at different levels of governance Drawing on examples from sub Saharan Africa and with an in depth case study of land politics in Tanzania the book assesses guidelines developed by institutions such as the Food and Agriculture Organization of the United Nations and the World Bank to highlight essential considerations for developing and implementing gender sensitive policy Illustrating how gender shapes resource policy across all levels of political activity Gender and the Global Land Grab provides valuable tools for transforming global policymaking

African Feminisms and Women in the Context of Justice in Southern Africa Cori Wielenga, 2021-10-07 This book explores justice on the ground in Southern African communities and in particular the roles that women play in these processes Justice on the ground is often critiqued for being male dominated and patriarchal This volume seeks to unpack and problematize this assumption through the case studies of Namibia Zimbabwe Mozambique and South Africa Contributions focus on the lived experiences of women and the intersections of race class culture and the colonial experience that shape their lives In the rural and peri urban contexts discussed in this book justice on the ground is found to be relational The network of relationships between people and the well being and health of a community as an integral whole continue to be of central importance as the survival of the community depends on the entire community functioning interdependently An

engagement with African feminisms is helpful in providing a number of lenses or simply questions through which to read the case studies. These case studies reveal the complex and organic ways in which women have power and influence in relation to justice on the ground which may not be immediately obvious.

Gender Justice and Legal Pluralities Rachel Sieder, John McNeish, 2013-06-17. *Gender Justice and Legal Pluralities: Latin American and African Perspectives* examines the relationship between legal pluralities and the prospects for greater gender justice in developing countries. Rather than asking whether legal pluralities are good or bad for women, the starting point of this volume is that legal pluralities are a social fact. Adopting a more anthropological approach to the issues of gender justice and women's rights, it analyzes how gendered rights claims are made and responded to within a range of different cultural, social, economic, and political contexts. By examining the different ways in which legal norms, instruments, and discourses are being used to challenge or reinforce gendered forms of exclusion, contributing authors generate new knowledge about the dynamics at play between the contemporary contexts of legal pluralities and the struggles for gender justice. Any consideration of this relationship must, it is concluded, be located within a broader, historically informed analysis of regimes of governance.

Mapping Global Justice Arnaud Kurze, Christopher K. Lamont, 2022-10-14. Persistent international conflicts, increasing inequality in many regions of the world, and acute environmental and climate-related threats to humanity call for a better understanding of the processes, actors, and tools available to face the challenges of achieving global justice. This book offers a broad and multidisciplinary survey of global justice, bridging the gap between theory and practice by connecting conceptual frameworks with a panoply of case studies and an in-depth discussion of practical challenges. Connecting these critical aspects to larger moral and ethical debates is essential for thinking about large abstract ideas and applying them directly to specific contexts. Core content includes: Key debates in global justice from across philosophy, postcolonial studies, political science, sociology, and criminology; The origins of global justice and the development of the human rights agenda; peacekeeping and post-conflict studies; Global poverty and sustainable development; Global security and transnational crime; Environmental justice; public health and well-being. Rather than providing a blueprint for the practice of global justice, this text problematizes efforts to cope with many justice-related issues. The pedagogical approach is designed to map the difficulties that exist between theory and praxis, encourage critical thinking, and fuel debates to help seek alternative solutions. Bringing together perspectives from a wealth of disciplines, this book is essential reading for
