Wooden Ship The Art History And Revival Of Wooden Boatbuilding:

Wooden Ship Peter H. Spectre, David Larkin, Paul Rocheleau, 1991 Covers the art of wooden shipbuilding from the canoe to the pleasure craft of modern times *A Boston Schooner in the Royal Navy, 1768-1772* Phillip Reid, 2023 Uses rare surviving records including fully intact logbooks to situate the customs enforcement interceptor Sultana within the wider picture of the British Atlantic in this crucial period HONORABLE MENTION 2023 Lyman Book Award for North American Naval History The small Boston built schooner Sultana served as a customs enforcement interceptor on the North American eastern seaboard in the period leading up to the American Declaration of Independence when British taxation of American trade was a hugely contentious issue As a typical workaday British American merchant ship taken into naval service Sultana offers a rare opportunity to understand a technology of paramount importance to this world where records for merchant ships are scarce but where in this case a wealth of information from plan drawings to the fully intact logbooks has survived The book provides a detailed narrative of the ship's activities and reveals the nature of life on board and the day to day business of operating a small sailing ship It explores the technology of the ship and her sailing qualities as revealed by the ship's logs and also by the performance of a modern replica In addition the book situates Sultana's role within the wider picture of the British Atlantic in this crucial period It is thereby both naval microhistory and also Atlantic history for all scholars interested in the formation and development of the British Atlantic world Yachting , 1992-05 **The Merchant Ship in the British Atlantic, 1600-1800** Phillip Reid, 2020-04-14 In *The Merchant Ship in the British Atlantic 1600-1800* Phillip Reid refutes the long held assumption that merchant ship technology in the British Atlantic during the two centuries of its development was static for all intents and purposes and that whatever incremental changes took place in it were inconsequential to the development of the British Empire and its offshoots Drawing on a unique combination of evidence from both traditional and unconventional sources Phillip Reid shows how merchants shipwrights and mariners used both proven principles and adaptive innovations in hulls rigs and steering systems to manage high physical and financial risks Listen also to the podcast where the author is interviewed about the book for New Books Network and the podcast with Liz Covart for Ben Franklin's World by clicking here **A Guide for Using *The Witch of Blackbird Pond* in the Classroom** Dona Rice, 1992-06 Presents lesson plans curriculum connections activities vocabulary help a related reading list and other materials for teaching *The witch of Blackbird Pond* by Elizabeth George Speare From Sail to Steam Richard V.
