The Theory of Invisibility Aimee Pitta, 2014-04-24 We see who we want to see We believe in what we want to believe When we stop believing we stop being seen Set against the backdrop of California's beautiful Venice Canals The Theory of Invisibility is a modern day fable that uses magical realism as an expression of one's loss of faith Emme Taylor haunted by the death of her husband and son and unable to interact with the world as she's known it slips into a state of invisibility When Emme seemingly disappears Morgan Emme's sister immediately fears the worse and shines a spotlight of suspicion on Phil Emme's co worker As Emme struggles through her haze of grief she must decide if she should sacrifice her cloak of invisibility in order to save the one's she loves

The Oxford Handbook of Social Psychology and Social Justice Phillip L. Hammack, 2018-02-15 The twentieth century witnessed not only the devastation of war conflict and injustice on a massive scale but it also saw the emergence of social psychology as a discipline committed to addressing these and other social problems In the 21st century however the promise of social psychology remains incomplete We have witnessed the reprise of authoritarianism and the endurance of institutionalized forms of oppression such as sexism racism and heterosexism across

the globe Edited by Phillip L Hammack The Oxford Handbook of Social Psychology and Social Justice reorients social psychology toward the study of social injustice in real world settings The volume s contributing authors effectively span the borders between cultures and disciplines to better highlight new and emerging critical paradigms that interrogate the very real consequences of social injustice United in their belief in the possibility of liberation from oppression with this Handbook Hammack and his contributors offer a stirring blueprint for a new important kind of social psychology today

The Art of Status Jelena Subotic,Professor of Political Science Jelena Subotic,2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s Since then there have been national and global social movements demanding the return of looted art This shift has established not only that looting is wrong but more importantly that restitution is morally

right As a result of this reframing of what it means to own art an artifact's historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status The same objects that granted states high international status now threaten to provoke status decline In *The Art of Status* Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum Subotic tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states' desire for international status and prestige An in depth and nuanced account of art restitution disputes *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution

On the Politics of Educational Theory Tomasz Szkudlarek, 2016-11-03 *On the Politics of Educational Theory* considers the political significance of educational theory as a specific genre of public discourse Rather than understanding educational theories solely as addressing issues of childrearing and instruction this book aims to view educational theories in a broader socio political context It explores the role of educational theories in the construction of collective and political identities and analyses them as rhetorical strategies operating as political discourses Defining the methodological framework through the perspectives of Michel Foucault and Ernesto Laclau each chapter examines the ways in which theories of education contribute to the creation of social realities and identities Such issues as the construction of visibility and invisibility of power the tropes of temporality or the use of postulational language where theorists say what should be done in and by education are some of the threads that weave through particular theories from Rousseau to the discourse of education in the knowledge based society analysed as ontological rhetorics constitutive of political identities This book suggests a direction for a more conscious way of dealing with the political in education As such it will appeal to researchers academics and postgraduate students in the fields of educational research philosophy of education curriculum studies social and political theory and theory of education The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781315712505> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Studies in Lexical Phonology Sharon Hargus, Ellen M. Kaisse, 2014-05-19 *Studies in Lexical Phonology*

Migration, Protest Movements and the Politics of Resistance Tamara Caraus, Elena Paris, 2018-10-01 Migration and cosmopolitanism are said to be complementary Cosmopolitanism means to be a citizen of the world and migration without impediments should be the natural starting point for a cosmopolitan view However the intensification of migration through an increasing number of refugees and economic migrants has generated anti cosmopolitan stances Using the concept of cosmopolitanism as it emerges from migrant protests

like *Sans Papiers* *No One Is Illegal* and *No Borders* an interdisciplinary group of scholars addresses this discrepancy and explores how migrant protest movements elicit a new form of radical cosmopolitanism The combination of basic theoretical concepts and detailed empirical analysis in this book will advance the theoretical debate on the inherent cosmopolitan aspects of migrant activism As such it will be a valuable contribution to students researchers and scholars of political science sociology and philosophy

ReAction! Mark A. Griep, Marjorie L. Mikasen, 2009-08-12 *ReAction* gives a scientist's and artist's response to the dark and bright sides of chemistry found in 140 films most of them contemporary Hollywood feature films but also a few documentaries shorts silents and international films Even though there are some examples of screen chemistry between the actors and of behind the scenes special effects this book is really about the chemistry when it is part of the narrative It is about the dualities of Dr Jekyll vs inventor chemists the invisible man vs forensic chemists chemical weapons vs classroom chemistry chemical companies that knowingly pollute the environment vs altruistic research chemists trying to make the world a better place to live and finally about people who choose to experiment with mind altering drugs vs the drug discovery process Little did Jekyll know when he brought the Hyde formula to his lips that his personality split would provide the central metaphor that would come to describe chemistry in the movies This book explores the two movie faces of this supposedly neutral science Watching films with chemical eyes Dr Jekyll is recast as a chemist engaged in psychopharmaceutical research but who becomes addicted to his own formula He is balanced by the often wacky inventor chemists who make their discoveries by trial and error

Sourcebook on Feminist Jurisprudence Hilaire Barnett, 2012-10-02 This book is a comprehensive analysis of the relationship between feminist theories and the law and the way in which developments of the former have affected and been affected by the latter The book takes as its starting point a study of women and culture on an international level which demonstrates how religious and cultural influences have been fundamental in establishing contemporary legal and social mores This provides the setting for an investigation into legal and social discrimination and inequality and how this has been addressed by the emergence of feminism A number of critiques and developments are examined

Off Beat Jan Hein Hoogstad, Birgitte Stougaard Pedersen, 2013-08-01 *Off Beat* Pluralizing Rhythm draws attention to rhythm as a tool for analyzing various cultural objects In fields as diverse as music culture nature and economy rhythm can be seen as a phenomenon that both connects and divides It suggests a certain measure with which people practices and cultures may comply Yet for this very reason rhythm can also function as a field of exclusion contestation and debate In that respect rhythm possesses an underestimated meaning creating potential Whereas

its connecting force is often accentuated in the aesthetic political and commercial usage of the term the divisive aspect of rhythm is at least as important This volume wants to rid rhythm of its harmless nearly esoteric reputation as a cosmic unifier by understanding it in the light of the contemporary medial turn In the present collection of essays we have encouraged approaches that combine political aesthetic musical and theoretical dimensions of rhythm Jan Hein Hoogstad is Assistant Professor in Comparative Literature and Cultural Analysis at the University of Amsterdam the Netherlands Birgitte Stougaard Pedersen is Associate Professor in the Section for Aesthetics and Culture Department of Aesthetics and Communication Aarhus University Denmark
