The Transreal Political Aesthetics Of Crossing Realities:

The Transreal Micha Cárdenas, 2011 *The Transreal Political Aesthetics of Crossing Realities* explores the use of multiple simultaneous realities as a medium in contemporary art including mixed reality augmented reality and alternate reality approaches Building on the notion of trans from transgender signifying the crossing of boundaries the book proposes that transreal aesthetics cross the boundaries created by a proliferation of conceptions of reality that occurred as a result of postmodern theory and emerging technologies *Critical Concepts for the Creative Humanities* Iris van der Tuin, Nanna Verhoeff, 2022-02-15 This concise precise and inclusive dictionary contributes to a growing transforming and living research culture within both humanities scholarship and professional practices within the creative sectors Its format of succinct starting definitions demonstrations of possible routes of further development and references to new and revisited concepts as conceptual invitations allows readers to quickly uptake and orient themselves within this exciting methodological field for didactic scholarly and creative use and as a starting point for further investigation for future contributions to the new canon of critical concepts *Critical Concepts for the Creative Humanities* is the first book to outline and define the specific and evolving field of the creative humanities and provides the field's nascent bibliography *Transmovimientos* Ellie D. Hernandez, Eddy Francisco Alvarez, Jr., Magda García, 2021-06 This anthology features work by and about queer trans and gender nonconforming Latinx communities including immigrants and social dissidents who reflect on and write about diaspora and migratory movements while navigating geographical and embodied spaces in the United States *Critical Digital Studies* Arthur Kroker, Marilouise Kroker, 2013-01-01 An indispensable resource for instructors and students in digital studies programs *Critical Digital Studies* is a comprehensive creative and fascinating look at a digital culture that is struggling to be born survive and flourish Publisher description *Systemic Dramaturgy* Michael Mark Chemers, Mike Sell, 2022-11-17 In this handbook for working theatrically with technology authors Michael Mark Chemers and Mike Sell discuss in depth the application of the critical skills cultivated by dramaturgs to extra theatrical endeavors including games multi platform performance and installations **The SAGE Encyclopedia of Trans Studies** Abbie E. Goldberg, Genny Beemyn, 2021-02-26 Transgender studies broadly defined has become increasingly prominent as a field of study over the past several decades particularly in the last ten years The experiences and rights of trans people have also increasingly become the subject of news coverage such as the ability of trans people to access restrooms their participation in the military the issuing of driver's licenses that allow a third gender option the growing visibility of nonbinary trans teens the denial of gender affirming health care to trans youth and the media's misgendering of trans actors With more and more trans people being open about their gender identities doctors nurses psychologists social workers counselors educators higher education administrators student affairs personnel and others are increasingly working with trans individuals who are out But many professionals have little formal training or awareness of the life experiences and needs of the trans population This can

seriously interfere with open communications between trans people and service providers and can negatively impact trans people's health outcomes and well-being as well as interfere with their educational and career success and advancement. Having an authoritative academic resource like *The SAGE Encyclopedia of Trans Studies* can go a long way toward correcting misconceptions and providing information that is otherwise not readily available. This encyclopedia featuring more than 300 well-researched articles takes an interdisciplinary and intersectional approach to trans studies. Entries address a wide range of topics from broad concepts e.g. the criminal justice system, activism, mental health to specific subjects e.g. the trans pride flag, the Informed Consent Model, voice therapy to key historical figures, events and organizations e.g. Lili Elbe, the Stonewall Riots, Black Lives Matter. Entries focus on diverse lives, identities and contexts including the experiences of trans people in different racial, religious and sexual communities in the United States and the variety of ways that gender is expressed in other countries. Among the fields of studies covered are psychology, sociology, history, family studies, K-12 and higher education, law, political science, medicine, economics, literature, popular culture, the media and sports.

Percy Shelley For Our Times Omar F. Miranda, Kate Singer, 2024-03-14 Two centuries after Percy Shelley's death, this volume explores his continuing collaborations with audiences across spaces and times.

Photographing Ambiguity Ted Hiebert, 2025-05-02 *Photographing Ambiguity* examines photography as a metaphor for technological culture, arguing that a relational exploration of the medium can shed light on the dominant ideological tendencies of our time. The book advocates for photographic practices that emphasize ambiguity, suggesting that this approach fosters more conscientious, ecological and creative relationships within the technological ecosystem of contemporary life. Ted Hiebert critiques the notion that images should primarily serve to verify or document the external world. He contends that these quantifiable perspectives, while rooted in historical trends towards technology and data, have become so pervasive that they represent a dominant ideological bias in the twenty-first century. In response to this data-driven consciousness, the book presents a series of exercises designed to cultivate an embodied experience with digital living, not in opposition to the flood of images but within it. Ultimately, *Photographing Ambiguity* encourages readers to understand photographs not as benchmarks of reality but as ambiguous constructions of our present and future imaginaries.

Viral Behaviors Roberta Buiani, 2024-08-22 In a new era of global virology that requires novel methodologies to improve the comprehension of viruses and viral phenomena, *Viral Behaviors* explores the cultural material and artistic significance of viral agents. Across a rich variety of case studies stemming from different areas of interest, covering literature, the graphic arts and scientific visualization as well as performance, installation and bioart, this book asks whether embracing the complexity of viruses rather than obsessively measuring, dissecting or precisely mapping their parts and manifestations may provide new methodological directions in the intersection of scientific thinking and artistic practice. The book examines the struggles and successes of science and technology to tame the elusive nature and behavior of viruses and the potential of art-based and cross-disciplinary collaborations to better communicate

their complex making and intense entanglement with the world at large Combining perspectives from art philosophy science and technology it places biological and informational viruses alongside each other revealing that while the two types of agents affect the world in very different ways their histories and manifestations contain surprising similarities that speak to a cultural continuum *Viral Behaviors* unravels the extraordinary mobility of viruses across disciplines and their intersection with all aspects of culture rather than their import within one specific disciplinary realm It shows how the numerous attempts by artists scientists and professionals to tackle represent and appropriate viruses and their intricate dynamism can lead to new nuanced and sophisticated understandings of these substances and their related phenomena and reveals the contribution of non measurable or non traditional practices in their construction and dissemination Reprogrammable Rhetoric Michael J. Faris, Steve Holmes, 2022-09-01 *Reprogrammable Rhetoric* offers new inroads for rhetoric and composition scholars past and present engagements with critical making Moving beyond arguments of inclusion and justifications for scholarly legitimacy and past historicizations of the material turn in the field this volume explores what these practices look like with both a theoretical and hands on how to approach Chapters function not only as critical illustrations or arguments for the use of reprogrammable circuits but also as pedagogical instructions that enable readers to easily use or modify these compositions for their own ends This collection offers nuanced theoretical perspectives on material and cultural rhetorics alongside practical tutorials for students researchers and teachers to explore critical making across traditional areas such as wearable sensors Arduinos Twitter bots multimodal pedagogy Raspberry Pis and paper circuitry as well as underexplored areas like play gaming text mining bots and electronic monuments Designed to be taught in upper division undergraduate and graduate classrooms these tutorials will benefit non expert and expert critical makers alike All contributed codes and scripts are also available on Utah State University Press's companion website to encourage downloading cloning and repurposing Contributors Aaron Beveridge Kendall Gerdes Kellie Gray Matthew Halm Steven Hammer Cana Uluak Itchuaqiyah John Jones M Bawar Khan Bree McGregor Sean Morey Ryan Omizo Andrew Pilsch David Rieder David Sheridan Wendi Sierra Nicholas Van Horn **Radical Botany** Natania Meeker, Antónia Szabari, 2019-12-03 Succeeds beautifully in discovering and entwining an entire tradition of speculative botany that will reshape plant studies and posthumanist theory Stacy Alaimo author of *Exposed* *Environmental Politics and Pleasures in Posthuman Times* *Science Fiction Technoculture Studies Book Prize Winner* *Radical Botany* excavates a tradition in which plants participate in the effort to imagine new worlds and envision new futures Modernity the book claims is defined by the idea of all life as vegetal Meeker and Szabari argue that the recognition of plants liveliness and animation as a result of scientific discoveries from the seventeenth century to today has mobilized speculative creation in fiction cinema and art Plants complement and challenge notions of human life *Radical Botany* traces the implications of the speculative mobilization of plants for feminism queer studies and posthumanist thought If as Michael Foucault has argued the notion of the human was born at a particular

historical moment and is now nearing its end Radical Botany reveals that this origin and endpoint are deeply informed by vegetality as a form of pre and posthuman subjectivity The trajectory of speculative fiction which this book traces offers insights into the human relationship to animate matter and the technological mediations through which we enter into contact with the material world Plants profoundly shape human experience from early modern absolutist societies to late capitalism s manipulations of life and the onset of climate change and attendant mass extinction A major intervention in critical plant studies Radical Botany reveals the centuries long history by which science and the arts have combined to posit plants as the model for all animate life and thereby envision a different future for the cosmos **Dismantling the Patriarchy, Bit by Bit**

Bit Judith K.
